## 4 Identity Assurance Framework: 5 Rules governing Assurance Assessments

6 **Version:** 2.0  
7 **Date:** 2015-09-04  
8 **Status:** Final Recommendation  
9 **Approval:** KIA20150831

10 **Editor:** Richard G. Wilsher

### 13 Abstract

14 The Kantara Initiative Identity Assurance Work Group (IAWG) was formed to foster  
15 adoption of identity trust services. The primary deliverable of the IAWG is the Identity  
16 Assurance Framework (IAF), which is comprised of many different documents that detail  
17 the levels of assurance and the certification program that bring the Framework to the  
18 marketplace. The IAF set of documents includes an Overview publication, the *IAF*  
19 *Glossary*, a summary *Assurance Levels* document, and an *Assurance Assessment Scheme*  
20 (*AAS*), which encompasses the associated assessment and certification program, as well  
21 as several subordinate documents, among them these *Service Assessment Criteria (SAC)*,  
22 which establishes baseline criteria for general organizational conformity, identity  
23 proofing services, credential strength, and credential management services against which  
24 all CSPs will be evaluated.

25 The latest versions of each of these documents can be found on Kantara's [Identity](#)  
26 [Assurance Framework - General Information web page](#).

27

28 **Notice:**

29 This document has been prepared by Participants of Kantara Initiative. Permission is hereby  
30 granted to use the document solely for the purpose of implementing the Specification. No rights  
31 are granted to prepare derivative works of this Specification. Entities seeking permission to  
32 reproduce portions of this document for other uses must contact Kantara Initiative to determine  
33 whether an appropriate license for such use is available.

34 Implementation or use of certain elements of this document may require licenses under third party  
35 intellectual property rights, including without limitation, patent rights. The Participants of and any  
36 other contributors to the Specification are not and shall not be held responsible in any manner for  
37 identifying or failing to identify any or all such third party intellectual property rights. This  
38 Specification is provided "AS IS," and no Participant in the Kantara Initiative makes any warranty  
39 of any kind, expressed or implied, including any implied warranties of merchantability, non-  
40 infringement of third party intellectual property rights, and fitness for a particular purpose.  
41 Implementers of this Specification are advised to review the Kantara Initiative's website  
42 (<http://www.kantarainitiative.org/>) for information concerning any Necessary Claims Disclosure  
43 Notices that have been received by the Kantara Initiative Board of Trustees.

## 65 1 INTRODUCTION

---

### 66 1.1 Status and Readership

67 This document sets out **normative** Kantara requirements and is required reading for all Kantara  
68 Accredited Assessors and applicant Service Providers. It will also be of interest to those wishing  
69 to gain a detailed knowledge of the workings of the Kantara Initiative's Identity Assurance  
70 Framework.

### 71 1.2 Purpose

72 The ultimate goal of the Kantara Initiative's Identity Assurance Framework (IAF) is the  
73 facilitation of intra- and inter-Federation transactions based upon a range of identity credentials,  
74 across a number of levels of assurance, in which Relying Parties can have the confidence that the  
75 credentials bearing the Kantara Initiative Trust Mark are worthy of their trust.

76 To accomplish this Kantara Initiative operates an *Assurance Assessment Scheme (AAS)*, an  
77 assessment and approval program which assesses the operating standards of certain players in the  
78 Identity and Credential Assurance Management space against strict criteria, and grants to  
79 Applicants to the scheme the right to use the Kantara Initiative Mark, a symbol of trustworthy  
80 identity and credential management services at specified Assurance Levels (i.e. a Grant of Rights  
81 of Use – hereafter 'Grant').

82 In implementing the AAS certain Rules are required to be set out, to support fulfillment of the  
83 Assessment Scheme and to direct how certain actions and processes within it are bounded and  
84 executed. This present document serves that purpose and can be considered to sit between the  
85 AAS and the *Service Assessment Criteria*, to which Approved Services must conform and against  
86 which their conformity must be assessed by Kantara-Accredited Assessors.

87 The latest versions of each of the IAF documents referenced in this document can be  
88 found on Kantara's [Identity Assurance Framework - General Information web page](#).

### 89 1.3 Changes in this revision

90 The principal reasons for changes in this revision are to:

- 91 a) revise the requirement concerning the performance of Period of Time  
92 assessments and when the 'operational period' is considered to commence;
- 93 b) more accurately title the 'Day Zero' assessment concept as 'Ready-to-Operate'  
94 assessments;
- 95 c) more clearly define what are the expectations upon Assessors when performing  
96 'Ready-to-Operate' assessments, as opposed to 'Period-of-Time' assessments;

97 d) provide for the exclusion of criteria where the obligations they convey are  
98 transferred to the service's customers.

99 In addition, the opportunity has been taken to:

100 e) clarify that, whether Full or Component Service, the service must conform to  
101 ALL criteria in the CO-SAC (this is also stated in the SAC but is re-stated here  
102 so as to reinforce that requirement);

103 f) neutralize the use of 'CSP' by replacing with plain language, given the chronic  
104 application of TLAs to describe electronic identity-related services in confusing  
105 and conflicting ways.

106 All revisions between v1.0 and v2.0 are shown with a grey background.

107 **2 GLOSSARY**

---

108 All special terms used in this document are defined in the [IAF Glossary](#).

## 109 **3 APPLICATION OF SERVICE ASSESSMENT CRITERIA**

---

### 110 **3.1 Principles**

111 Kantara's [Service Assessment Criteria](#) (SAC) are in two classifications, Common Organizational  
112 Criteria (CO-SAC) and Operational Criteria (OP-SAC), and Services may be submitted for  
113 Approval in two classifications, as a Service Component or as a Full Service. This Section defines  
114 the rules under which Applicants for Service Approvals must be assessed and must conform to  
115 applicable criteria.

#### 116 **3.1.1 Statement of Conformity**

117 The Statement of Conformity (SoC) (a document required by the [Specification of a Service](#)  
118 [Subject to Assessment – S3A](#)) must identify the applicable version of the SAC and state, for each  
119 criterion and at each applicable Assurance Level(s), whether the criterion is:

- 120 a) “not within scope”, where the criterion is excluded because the scope of the service does  
121 not include functionality which the criterion addresses;
- 122 b) fulfilled by another, previously-Approved, Component Service which is incorporated into  
123 the Applicant Service (which must be identified according to its Kanata Approval  
124 reference); or
- 125 c) is fulfilled directly by the Applicant Service, in which case the SoC must state how  
126 conformity is achieved; or
- 127 d) “not applicable”, with a justification as to why the criterion is deemed non-applicable  
128 when it otherwise falls within the scope (e.g. where a technical solution may permit a  
129 choice of means for conforming, those means not implemented would be ‘not applicable’).

130 Kantara prescribes the required minimum content of the SoC but not a specific structure. The  
131 SoC may be a stand-alone document or may be incorporated into another document if that is  
132 justified. Kantara's requirement is that a specific documented source of the required information  
133 be available and labeled as the SoC.

134 As stated in the SAC, all services must conform to all CO-SAC criteria. However, depending on  
135 whether the service in question is a Full or Component Service, how the criteria from the OP-SAC  
136 are addressed may vary, as described below.

#### 137 **3.1.2 Service Component Assessments**

138 A Service Component's SoC must identify which OP-SAC criteria are applicable (i.e. are within  
139 the service's scope) and for those criteria must state how conformity with them is achieved.

140 The concept of a Service Component is intended to permit flexibility with a Full Service whose  
141 Provider which may choose to operate their service core as the basis for multiple service offerings  
142 using different Service Components (e.g. to satisfy different market sectors or to permit operations

143 in different jurisdictions). This approach allows significant flexibility in how services are  
144 developed by no longer imposing a specific dominance of any particular aspect of the service's  
145 provision<sup>1</sup>.

146 Applicants for Service Component Approval must justify the selection of OP-SAC criteria to  
147 which they have elected to conform – the ARB, in assessing an application, shall review the scope  
148 of the SoC and shall have the right to ask the Applicant to justify their scope.

149 The operator of an Approved Service Component is entitled to market their service as being  
150 Kantara (Component)-Approved to any parties but, where the consumer of that service is not  
151 another Kantara-Approved Service (whether Component or Full), Kantara Initiative shall make no  
152 claims, nor make any warranties, nor have any interest or liability whatsoever as to the aggregate  
153 service, nor to any other non-Approved services.

### 154 **3.1.3 Full Service Assessments**

155 A Full Service may have all OP-SAC criteria met by the Applicant itself or they may be met by the  
156 inclusion of any number of Service Components.

157 The Applicant's SoC must (as stated above) state which criteria (if any) are met by any already-  
158 Approved Service Components, which will be initially verified by the Secretariat on first receipt  
159 of an Application for Full Service.

160 The Assessment of a Full Service must address all 100% of the SAC OP-SAC criteria  
161 within the collective service. This assessment need not include re-examination of the  
162 conformity of Component Services being included, unless circumstances suggest there is  
163 a justified reason to do so, but must establish that:

- 164
- 165 a) where any criterion happens to fall into more than one Component, that there is a clear  
166 responsibility on the part of one specific provider that that criterion is being met or that its  
167 dual operation does not present any conflicts in the overall provision of the service;
  - 168 b) there is adequate contractual specification, driven by the Full Service Provider, governing  
169 the technical responsibilities and inter-operation of the Components and evidence that that  
170 is being accomplished in reality;
  - 171 c) the provider of each Component Service has, within the thirty (30) days preceding the start  
172 of the assessment, provided an attestation to the effect that the scope, description,

---

<sup>1</sup> Previous versions of IAF-1400 SAC had assumed that the Credential Management component of an overall service would be pre-eminent.

173 operation and conformity of their Component has not materially changed<sup>2</sup> since the last  
174 Assessment of that Component.

175 The implication of the above is that a Full Service Provider may submit for Assessment and  
176 Approval a service constructed purely of previously-Approved Components (i.e. one in which the  
177 Provider making the Application provided no essential functionality whatsoever), thus making the  
178 determination of contractual arrangements fundamental to ensuring that the Components  
179 collectively deliver a Full Service.

180 Additionally, the Provider of a Full Service may exclude specific criteria where it can show that  
181 the responsibility for meeting those criteria is assumed by the Service Provider's customer(s).  
182 This provision allows for Providers' customers to efficiently leverage information and processes  
183 already in their hands. Providers who claim such exclusions must demonstrate how the excluded  
184 requirements are communicated to their customers and how their customers are obliged to fulfill  
185 them and the measures by which they shall be held accountable (typically through explicit notices  
186 and sections in service agreements).

187 Where a Provider seeks to exclude specific criteria by declaring them to be "not applicable" they  
188 must provide an explicit explanation of their purpose and intent, the affected criteria, and how the  
189 measures they will put in place to ensure the best likelihood of conformity being accomplished by  
190 the parties to whom those responsibilities are transferred.

#### 191 **3.1.4 Initial Assessment versus Annual Conformity Review**

192 Initial Assessments (i.e. those conducted for the purposes of a Grant of a three-year  
193 Approval) shall require assessment against all criteria defined in the Applicant's SoC and  
194 agreed-to by the ARB

195 The Kantara IAF's assessment model is based on established best practice as defined in  
196 ISO/IEC 17021, "*Conformity assessment - Requirements for bodies providing audit and*  
197 *certification of management systems*"), which allows for annual reviews to be less  
198 demanding than the initial assessment, subject to the three-year cycle being re-  
199 commenced when the Grant of Approval is renewed on the third anniversary of it being  
200 last granted.

201 Therefore, the Annual Conformity Reviews performed on the first and second  
202 anniversaries of the initial Grant of Approval may have a reduced scope, as defined in the  
203 RAA.

---

<sup>2</sup> A material change would be one which required a change to the scoping statement, involved a change of functionality provided or the manner of provision of defined functionality, or which had changed to the point where conformity to any applicable SAC requirement could no longer be upheld or had been replaced by a means of conformity which had not been reviewed in the course of the Assessment on which the present Approval was granted.

204 **3.1.4.1 AL1 ACRs**

205 For ACRs conducted at AL1, no actual assessment shall be required. CSP's shall submit  
206 to the ARB a self-assertion of their continued conformance with all applicable criteria  
207 (per their SoC).

208 **3.1.4.2 AL2, 3, 4 ACRs**

209 For ACRs conducted at ALs 2, 3 and 4 the scope of criteria to be assessed shall be:

- 210 a) all criteria falling within the Core<sup>3</sup> set;  
211 b) any criteria addressing areas of risk which are of concern to either the CSP  
212 itself or to its Assessor;  
213 c) any criteria against which a non-conformity was identified and subsequently  
214 remediated (or for which remediation is outstanding) at the preceding  
215 assessment (of either type);  
216 d) any criteria where there has been either:  
217 i) a change arising from a revision to the applicable version of the SAC; or  
218 ii) a significant change to how the service is operated and needs to be  
219 assessed (e.g. changes to outsourcing arrangements, or to applicable  
220 policies);  
221 e) fifty per cent of all other criteria, such that, over the course of two ACRs, all  
222 criteria not already included within a) – d) above are assessed.

223 For ACRs conducted at ALs 2, 3 and 4, CSP's shall submit to the ARB a KAR  
224 confirming continued conformance with all applicable criteria (per the CSP's SoC).

225 **3.1.5 Ready-to-Operate versus Period-of-Time Assessments**

226 **3.1.5.1 Ready-to-Operate Assessments**

227 It is a basic Kantara requirement that Approved services are fully operational. However,  
228 Service Providers may desire a Kantara Approval in advance of there being any  
229 operational history on which a Period-of-Time (PoT) assessment could be based.  
230 Kantara provides for such circumstances by accepting a Ready-to-Operate (RTO)  
231 Assessment (i.e. one in which there is no operational record to underpin the quality of the  
232 assessment) as an interim measure, conditional upon a PoT Assessment being provided  
233 within a specific period (see below) after the point in time at which operational records  
234 begin to be generated.

235 'Ready-to-Operate' shall be understood to require that the service meets all applicable  
236 criteria to the fullest extent practicable but for the provision of proof of effective  
237 operation through the furnishing as evidence of records accumulated during the service's

---

<sup>3</sup> Those criteria considered to be Core and therefore requiring annual assessment are indicated as such in versions of the SAC issued after this document's release.

238 operations. Other findings notwithstanding, no lesser readiness shall be accepted by  
239 Assessors as being sufficient to uphold a finding of conformance during a ‘Ready-to-  
240 Operate’ assessment. ‘Nearly-Ready-to-Operate’ is not a conformant state.

241 The availability of a RTO assessment is only open to providers of services at Assurance  
242 Levels 2, 3 and 4. All AL1 services shall be regarded as being operational by default and  
243 therefore be subject to a Period-of-Time audit.

244 Service Providers which elect to seek Approval based on a RTO Assessment may submit  
245 their Application at any time at which they are able to fulfill the applicable SAC,  
246 supported by their chosen Kantara-Accredited Assessor’s RTO Report, subject to the  
247 requirement that they must subsequently provide an Assessment Report based upon a  
248 PoT Assessment conformant to the operational period described below.

249 When Approval is granted on the basis of a RTO assessment the status of the Approval  
250 shall carry the qualifier ‘Ready To Operate’.

### 251 3.1.5.2 Period-of-Time Assessments

252 When the subject Service is already operational prior to being subjected to an  
253 Assessment, or becomes operational after previously undergoing a RTO assessment, the  
254 following periods of time are the minima for which services must be operating before a  
255 Period-of-Time (PoT) assessment can commence (i.e. one addressing a period of time  
256 over which the Service has been operational and therefore has established logs and  
257 records of operations which can provide adequate supporting evidence):

Assurance Level:	1	2	3	4
Minimum operational period (days)	n/a	30	60	90

258

259 Until such time as Approval is granted on the basis of a PoT Assessment, any ‘Ready To  
260 Operate’ Approval status based upon a RTO assessment will remain.

### 261 3.1.6 Site visits

262 At AL2 and above, when performing either an ‘initial’ or 3-year re-approval assessment,  
263 Period of Time assessment, the Assessor shall conduct an on-site visit sufficient to ensure  
264 that operations are being adequately executed. Although site visits are not mandatory  
265 when an ACR is being performed, Assessors should consider, in their review of risk  
266 associated with the assessment, the need for an on-site visit and act accordingly.

267 No site visits are required at AL1.

268 **4 REVISION HISTORY**

---

269

Vn.	Date	Status	Notes	Approved
1.0	2008-05-08	Initial Release	-	Liberty Alliance
2.0	2015-08-31	Public	Revision to eliminate un-used procedures, clarify/refine and reflect current practice, particularly regarding 'RTO' and 'PoT' assessment procedures.	Kantara ARB
