## 4 **Personal Request For Proposal (pRFP) Engagement Model**

5

6

7 **Version:** **Work Group Report**

8 **Date:** 2010-10-25

9 **Editor:** Joe Andrieu

10 **Status:** This document is a **Kantara Initiative Work Group Report**, it has been  
11 approved by the Information Sharing Work Group for submission to the  
12 Leadership Council.

13

14 **URL:** This document is available at  
15 [http://kantarainitiative.org/confluence/display/infosharing/Personal+RFP+](http://kantarainitiative.org/confluence/display/infosharing/Personal+RFP+Engagement+Model)  
16 [Engagement+Model](http://kantarainitiative.org/confluence/display/infosharing/Personal+RFP+Engagement+Model)

17

### 18 **Abstract:**

19 Sally uses a Personal Request for Proposal (pRFP) to solicit offers for, negotiate, and purchase a new car  
20 through the MyPal pRFP Broker. She has previously researched her options and made up her mind about  
21 the kind of car she wants to buy. She has also secured financing and credentials asserting that fact.  
22 Sally's information is maintained in a personal data store, which provides it on demand for use by  
23 service providers and vendors. On the Vendor side, Frank at Chryota of London responds to Sally's  
24 Personal RFP (pRFP), using a hands-on approach that integrates CoL's CRM system, MyPal, and Chryota  
25 Manufacturing's CRM program HEARING AID, which is managed by Jimmy.

26 This engagement model is a detailed expansion of Step #3 of the Information Sharing Work Group's Car  
27 Buying Engagement Model, an instance of the Customer-Supplier Engagement Framework.

28 For consistent context, the events described in this model are presumed to take place in the United  
29 Kingdom.

53

54 **Distinctions**

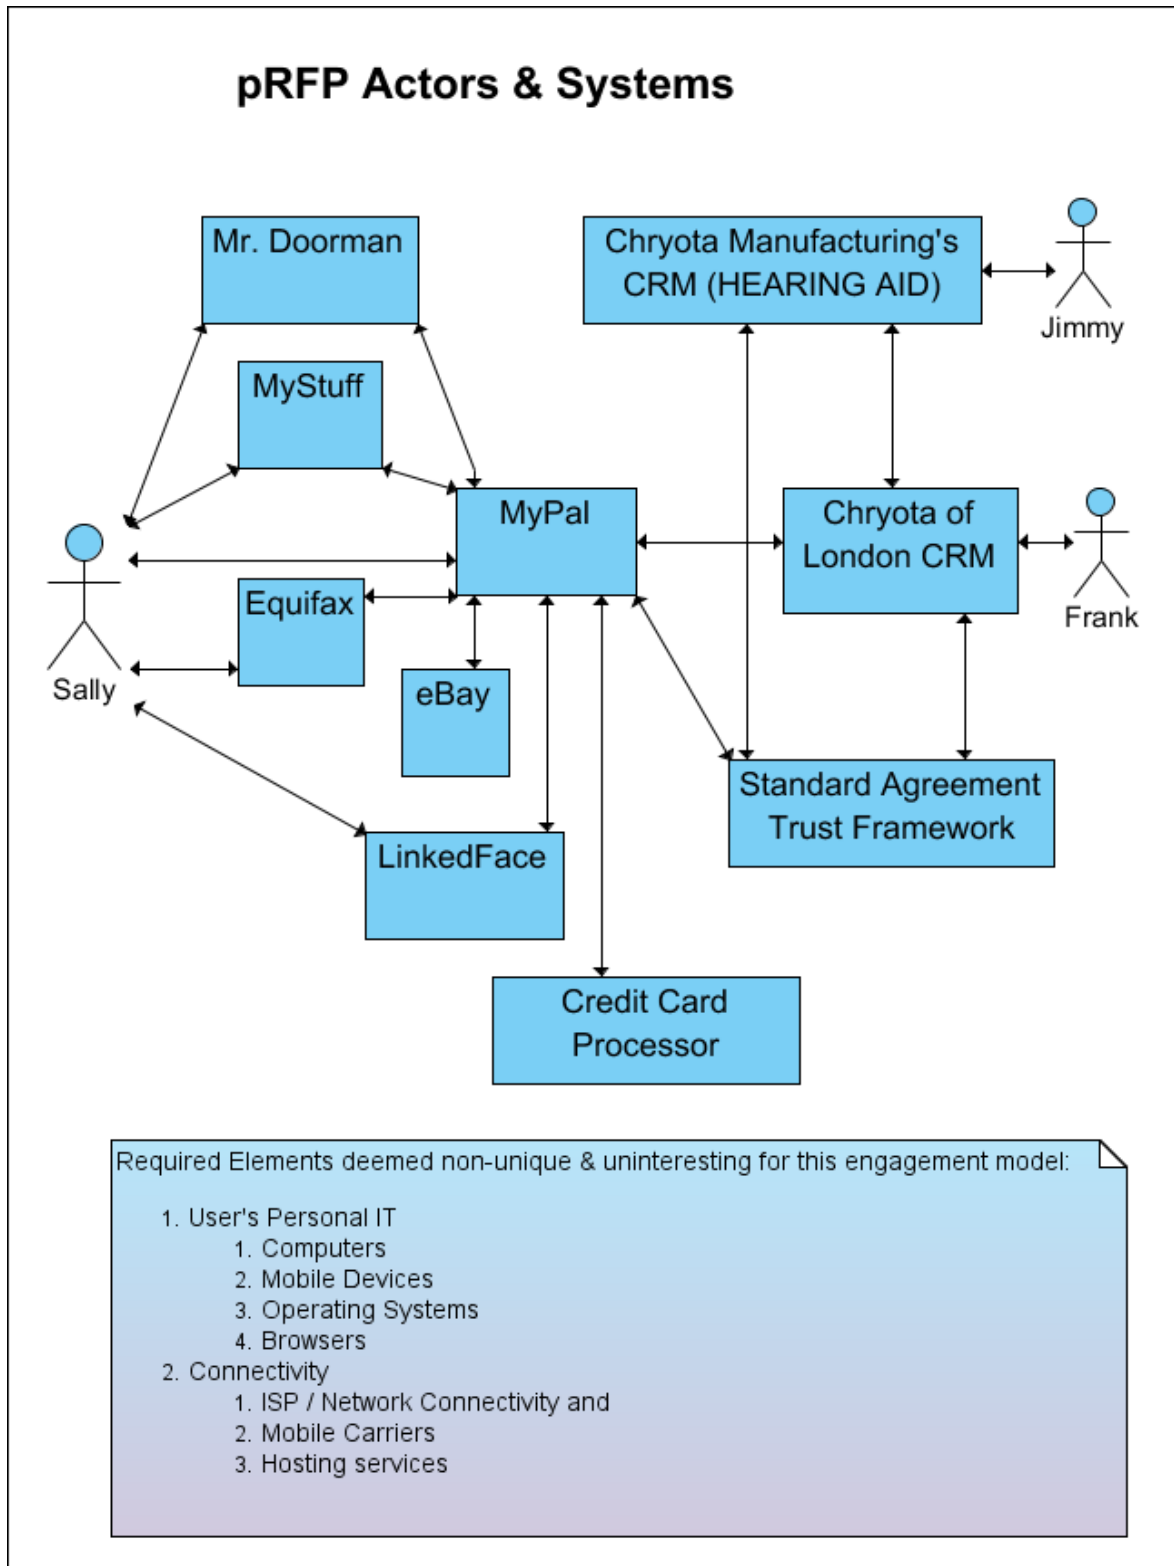

- 55     1. Single Conceptual Personal Data Store, using data hosts and authorization managers
- 56     2. Personal Request for Proposal
- 57         a. Limited duration information sharing
- 58         b. Vendor integration
- 59     3. Legacy system integration

60 **Actors**

- 61     1. Sally – An individual
- 62     2. Jimmy – An employee of Chryota Manufacturing
- 63     3. Frank – An employee of Chryota of London
- 64     4. Hybrid Service Providers
- 65         a. MyPal, RFP Broker
- 66     5. Facilitators
- 67         a. MyStuff, Data Host
- 68         b. Mr. Doorman, Authorization Manager
- 69         c. Apple, mobile phone manufacturer
- 70         d. 02, mobile phone network provider

- 71 6. Vendors
- 72 a. Chryota, a car manufacturer
- 73 b. Authorized car dealers
- 74 c. Chryota of London, a Chryota authorized dealer
- 75 d. Sally's Credit Union (as a precursor)
- 76 e. Bose, makers of audio systems
- 77 f. Custom paint shop
- 78 Agencies (not engaged until the next stage in the Framework)
- 79 g. Driver and Vehicle Licensing Agency
- 80 h. Congestion Department

81 **System Diagram**

82

## 83 **Scenario – Sally's Experience**

84 Now that she knows what she wants, Sally fills out a PRFP template using MyPal's mobile phone app.  
85 She pulls in details from her prior research, specifying what she is interested in and how she wants the  
86 conversation to unfold.

87 Sally sets up MyPal as an Authorized Recipient with Mr. Doorman, provisioning MyPal as a pRFP Broker.  
88 She specifies the standard pRFP information use policy, which allows use only for responding to this  
89 pRFP, with long term storage only for quality control and future product and service development. It  
90 also allows authorized recipients not selected in the process to follow up once within the following year  
91 using Sally's protected inbox.

92 Second, Sally specifies what she is interested in and how she wants the conversation to unfold. To  
93 describe what she is looking for, Sally lists:

- 94 1. new 2010 Chryota Prius
- 95 2. enhanced Bose surround sound system (standard factory option)
- 96 3. standard Chryota kids package (car seat, etc.).
- 97 4. no convertible
- 98 5. custom color: Nemo (Clownfish) Orange w/ stripes (semi-structured)
- 99 6. purchase within 1 week
- 100 7. delivery in 2 weeks after purchase
- 101 8. drop off at her home
- 102 9. target price £22,000 (£10,000 cash deposit, balance on delivery)
- 103 10. buyer's financing (credit union loan for balance)
- 104 11. DVLA & Congestion permit paperwork (unstructured)
- 105 12. no Insurance (she already has it)
- 106

107 *This list includes*

- 108 • *Details about the product she wants*
- 109 • *Details about financing, price, and delivery*
- 110 • *Unstructured requests for customization or custom services*
- 111

112 *To specify how she wants the conversation to unfold, Sally details who is to receive the pRFP, the terms*  
113 *of use for reviewing the pRFP, and how and when she wants them to communicate with her.*

114 Sally starts building a white list of recipients by searching at MyPal through a list of Authorized Chryota  
115 Dealers within 25 miles of her home, and adds a few from a search of within 50 miles of her sister's. As  
116 she adds the vendors, MyPal presents notice of further distribution, letting Sally know with whom each  
117 Chryota dealer may share the pRFP information, allowing Sally to opt-out if possible. Each of the dealers  
118 lists Chryota Manufacturing, which Sally is ok with. MyPal's interface indicates one or more dealers have  
119 been excluded due to Sally's personal blacklist (as stored in her personal data store). Sally double checks

120 that list and totally agrees: Bob's Chryota is never getting her business again! Based on Sally's searches,  
121 MyPal suggests two additional vendors, one an online car dealer and another a car broker near Sally's  
122 home. Sally decides not to include those two in her recipient list. As she reviews possible recipients,  
123 MyPal displays the reputation information available for each Vendor. Sally drills down on the reputation  
124 details for two of the vendors, using MyPal's tracking data. At this point, she decides not to pay for the  
125 details provided by any of the third party reputation services.

126 When submitting this information, Sally authorizes MyPal, eBay, and Equifax as reputation providers for  
127 this transaction, linking this particular pRFP to Sally's reputation and tells Vendors that this transaction  
128 will be recorded for reputation tracking (of both Sally and the Vendor) at those three services. In  
129 exchange for this tracking information, the reputation providers agree to incorporate this transaction in  
130 future reputation scores and to provide a current reputation score to approved Vendors on a freemium  
131 business model: a simple score for free, details for a fee, while depersonalizing all information presented  
132 to help protect Sally's privacy. Sally also specifies that all questions asked during the pRFP process will be  
133 confidential, as will be their answers.

134 After a final review of the details, Sally tells MyPal to publish the pRFP, selecting the £25 option that will  
135 process offline paperwork, contact legacy vendors who haven't yet registered with MyPal, and host a  
136 protected inbox for communications with vendors. MyPal sends a notice to all of the Vendors on Sally's  
137 recipient list, giving them a way to review the pRFP once they agree to Sally's terms of use. For legacy  
138 vendors, MyPal makes a phone call, letting them know about the pRFP and recommending they sign up  
139 through their relationship with Chryota Manufacturing. Sally receives inquiries from two of the Vendors  
140 through MyPal, to which she replies. In her replies, she specifies that she wants the dealer to login to  
141 view her reply, rather than sending the message in clear text directly to the recipient. She ultimately  
142 receives offers meeting her criteria from three Vendors; those offers are hosted at MyPal.

143 After reviewing the offers, Sally calls Chryota of London and asks some additional questions. She takes  
144 notes on the conversation, which are stored along with the Vendor's offer at MyPal. Sally sends her  
145 husband a link to the offer (provisioning access via MyPal, and specifying her husband's contact service  
146 LinkedFace) and asks what he thinks. He likes it, but doesn't want the proposed audio system,  
147 suggesting a different model, just out from Bose. Sally sends a quick message to the Vendor, through  
148 MyPal, asking for the alternate sound system. The Vendor replies with an updated offer. Sally likes it and  
149 decides to pay £25 for Equifax's detailed reputation history for Chryota of London. She finds a history of  
150 recent transactions as well as reviews from actual customers in her area. Some of the reviews aren't so  
151 glowing, but they seem rare and from the comments, the customer may have been the unreasonable  
152 party.

153 After one last surf around the net to check out her alternatives, Sally makes her decision and commits to  
154 the sale, taking her to Step 4 of the Car Buying Engagement Model.

## 155 **Scenario – Jimmy's & Frank's Experience**

156 *[From this perspective, Jimmy & Frank are combined as a "user" of the pRFP system. We will distinguish*  
157 *between these parties when possible, but the system boundary lies between the combined user and the*  
158 *services comprising the pRFP system]*

159 Frank's CRM system at Chryota of London (CoL) is the first point of contact for Sally's pRFP from MyPal.  
160 Upon receiving the notice of the pRFP, the software automatically evaluates the terms of use, generates  
161 a non-repudiatable proof of acceptance of those terms, and uses proof of acceptance at MyPal to  
162 download the pRFP. The pRFP is recorded in the CoL CRM system as a sales lead and forwarded to the  
163 central Chryota CRM system, which Jimmy sees, in accordance with the permission for further  
164 distribution authorized in the delivery envelope (as per Sally's instructions to MyPal).

165 Given Sally's financial credentials, reputation, and shopping timeframe, her pRFP escalates to the top of  
166 Frank's incoming priority list. He reviews what she is looking for, and his CRM system automatically pulls  
167 up inventory at his dealership that meets all of the automatically verifiable criteria. Frank reviews the  
168 options and considers Sally's special requests. The easy one is the DVLA and permitting for the  
169 congestion charge administrator. His dealership routinely handles these matters for buyers and he's  
170 been looking forward to trying out the new semi-automated system provided by Chryota. He marks that  
171 criteria as met, with a brief note and indicating no price impact. He also connects the pRFP to the  
172 Chryota's paperwork reduction system so that the DVLA and congestion permitting will be handled as  
173 quickly as possible should they win the deal.

174 For the second request, the custom color, Frank picks up his phone and calls his favorite custom paint  
175 shop, asking for a price quote. He gets about two of these every month and the shop loves to work with  
176 the dealership. Within 15 minutes he has a firm, fixed price quote faxed to him from the shop. The fax  
177 isn't printed out. It goes directly into the CRM system, routed to Frank. Frank attaches the digital fax to  
178 the pRFP as an internal supplement (not to be redistributed), marking the criteria met, and entering the  
179 appropriate price impact (based on the shops price plus 10%). Finally, Frank reviews the delivery details  
180 and links the pRFP to their internal delivery scheduler, which confirms a £100 price impact, which is  
181 automatically entered into the pRFP tracking record.

182 Before preparing a final offer, Frank sends an inquiry to Sally asking if the initial £10,000 payment will be  
183 made in cash at the dealer, by personal or cashier's check through the post, by electronic check, or did  
184 she have another idea? The question is entered into the CoL CRM, which forwards it to Chryota's  
185 HEARING AID software and attaches the inquiry to the pRFP and automatically submits the message to  
186 MyPal. Sally's reply the next day clarifies that electronic check would be preferred. The reply is routed  
187 through MyPal to Chryota of London, automatically attached to the customer record, alerting Frank to  
188 the incoming message, and a copy is also sent to Chryota. Frank reads the message and updates the  
189 record with Sally's payment preference.

190 Frank walks over to his supervisor's office, bringing his tablet computer with the pRFP and offer ready  
191 for review. His boss pulls up the pRFP record on his machine, asks a few questions, and electronically  
192 approves the offer. Chryota of London's CRM system packages the offer and sends it to MyPal, which  
193 notifies Sally. CoL also sends a copy of the offer to Chryota's HEARING AID program.

194 Jimmy's dashboard presents a running view of the status of all pRFPs, resulting offers, and finalized  
195 deals, including key analytics and metrics about cost of acquisition, estimated manpower per sale,  
196 margins, and projected time-to-sale. Jimmy keeps on top of these numbers, because he knows their  
197 equivalents in the traditional advertising & sales funnel for Chryota. So far, people are coming in at a  
198 lower cost of acquisition, and apparently further along in the purchasing process, which is resulting in a  
199 rather attractive time-to-sale.

200 Within an hour, Frank gets a call from Sally, routed directly to him based on the phone # she called,  
201 which also pulls up the pRFP record on his computer. Sally asks about the paint shop that would be  
202 doing the work. Frank explains who would be doing it, sharing a story about one of the more memorable  
203 projects from last spring. Sally mentions she's heard horrible things about Mike's paint shop and wanted  
204 to be sure her new car would be well taken care of. Frank is able to assure her and adds a note to the  
205 pRFP that the quality of the paint job is especially important to Sally. Sally thanks him and lets him know  
206 she's probably going to make a decision in the next two days and hangs up. The call is automatically  
207 noted in the Chryota of London CRM system, and propagated up to Chryota's HEARING AID program,  
208 becoming part of the sales funneling on Jimmy's analytic dashboard. Frank writes up a quick summary  
209 of the call and updates the estimates for closing the deal and timeframe. The HEARING AID system not  
210 only combines these estimates for analysis, it also learns how good Frank is at his estimates and adjusts  
211 accordingly, giving the overall numbers the highest possible accuracy.

212 Sally's request for a different sound system is routed directly to the CoL and from there to Chryota's  
213 HEARING AID program. Frank is notified via SMS that he has an incoming pRFP update. He reviews the  
214 request and is surprised, because he hadn't heard about the new sound system from Bose. He asks his  
215 supervisor if knows about it and it is new to him as well. Frank searches online to see what he can find  
216 out, and in fact, Bose just announced the new system today. He pulls up the contact information for the  
217 dealership's Bose representative and calls to ask about the new systems pricing and availability. The rep  
218 gives him the standard dealer rate and confirms he can get the system in to the dealership in two days  
219 from order. Frank requests a confirmed quote, the Bose rep faxes over the details, which, just like the  
220 paint shop quote, get attached to the pRFP and the price impact added. With the new price, Frank  
221 triggers an update on the CoL CRM, which automatically propagates to the HEARING AID program and  
222 the pRFP at MyPal, which notifies Sally.

223 After Sally accepts the latest offer, we move to Step 4, Transact, of the Car Buying Engagement Model.

224 **Narrative – Sally's Experience**

225 Precursor: Sally already introduced MyStuff to Mr. Doorman and stored her Credit Union credentials at  
 226 MyStuff.

227

User Intent	System Responsibility
<p>Now that she knows what she wants, Sally fills out a PRFP template using MyPal's mobile phone app. She selectively pulls in details from her prior research.</p> <p>Sally sets up MyPal as an Authorized Recipient with Mr. Doorman, provisioning MyPal as a pRFP Broker. She specifies the standard pRFP information use policy, which allows use only for responding to this pRFP, with long term storage only for quality control and future product and service development. It also allows authorized recipients not selected in the process to follow up once within the following year using Sally's protected inbox.</p>	
<ol style="list-style-type: none"> <li>1. Start MyPal pRFP App on her mobile phone                         <ol style="list-style-type: none"> <li>a. Install mobile phone App</li> <li>b. Run app</li> </ol> </li> <li>3. Tell MyPal about MyStuff</li> <li>5. Login to Mr. Doorman and provision MyPal for access to specific information for the purposes of managing a pRFP process. Select information from the personal data store to be shared, including:                         <ol style="list-style-type: none"> <li>a. a <b>specific Search</b> history</li> <li>b. a specific digital scrapbook with notes and information on the car she wants</li> <li>c. vendor blacklist</li> <li>d. financial credentials from Credit Union</li> <li>e. Sally's address</li> <li>f. preferred contact channel (protected inbox address)</li> <li>g. the terms under which the information is to be shared (in this case, using standard pRFP terms)</li> </ol> </li> </ol>	<ol style="list-style-type: none"> <li>2. Setup App                         <ol style="list-style-type: none"> <li>a. Introduce app to MyPal servers</li> <li>b. Ask for personal data store</li> </ol> </li> <li>4. MyPal Attempts to get pRFP info from MyStuff                         <ol style="list-style-type: none"> <li>a. MyPal asks MyStuff for PRFP information</li> <li>b. MyStuff tells MyPal to see Mr. Doorman</li> <li>c. Mr. Doorman tells MyPal it needs proof of signature on standard information sharing agreement, specific authorization by Sally to provision MyPal for access, and proof of acceptance of Sally's terms of use.</li> <li>d. MyPal asks Sally to provision access using the URL from Mr. Doorman.</li> </ol> </li> <li>6. Mr. Doorman records the new policy for MyPal and redirects Sally back to MyPal.</li> <li>7. MyPal gets pRFP info from MyStuff                         <ol style="list-style-type: none"> <li>a. MyPal shows proof to Mr. Doorman                                 <ol style="list-style-type: none"> <li>i. signed token from a valid InfoSharing Trust Framework provider</li> <li>ii. signed token demonstrating acceptance of Sally's specific terms</li> </ol> </li> <li>e. Mr. Doorman gives MyPal key to MyStuff's data store</li> <li>f. MyPal requests &amp; gets pRFP information from MyStuff</li> </ol> </li> </ol>

	<p>8. MyPal Maps incoming pRFP information to pRFP template</p> <p>9. MyPal presents pre-filled template to Sally for confirmation</p>
<p>Second, Sally specifies what she is interested in and how she wants the conversation to unfold. To describe what she is looking for, Sally lists:</p> <ol style="list-style-type: none"> <li>1. new 2010 Chryota Prius</li> <li>2. enhanced Bose surround sound system</li> <li>3. standard Chryota kids package (car seat, etc.).</li> <li>4. no convertible</li> <li>5. custom color: Nemo (Clownfish) Orange w/ stripes (semi-structured)</li> <li>6. purchase within 1 week</li> <li>7. delivery in 2 weeks after purchase</li> <li>8. drop off at her home</li> <li>9. target price £22,000 (£10,000 cash deposit, balance on delivery)</li> <li>10. buyer's financing (credit union loan for balance)</li> <li>11. DVLA &amp; Congestion permit paperwork (unstructured)</li> <li>12. no Insurance (she already has it)</li> </ol>	
<p>10. Edits &amp; Confirms pRFP</p> <ol style="list-style-type: none"> <li>a. Removes irrelevant information</li> <li>b. Corrects incorrect information</li> <li>c. Adds new information</li> <li>d. Confirms edits</li> </ol>	<p>11. Record edits</p>
<p>Sally starts building a white list of recipients by searching at MyPal through a list of Authorized Chryota Dealers within 25 miles of her home, and adds a few from a search of within 50 miles of her sister's. As she adds the vendors, MyPal presents notice of further distribution, letting Sally know with whom each Chryota dealer may share the pRFP information, allowing Sally to opt-out if possible. Each of the dealers lists Chryota Manufacturing, which Sally is ok with.</p>	
<p>12. Ask for vendor selection tool.</p> <p>14. Request authorized Chryota dealers within 25 miles of her home.</p>	<p>13. Present Vendor selection tool</p> <ol style="list-style-type: none"> <li>a. suggest default query based on analysing information from personal data store. Suggestion:             <ol style="list-style-type: none"> <li>a. all car dealers</li> <li>b. near Sally's address (showing the address)</li> <li>c. proposed distance of 10 miles</li> <li>d. exclude vendors from Sally's blacklist</li> <li>e. ordered by reputation</li> </ol> </li> </ol> <p>15. Search information base and display results</p> <ol style="list-style-type: none"> <li>a. Show dealers meeting the criteria</li> <li>b. Indicated at least one blacklisted vendor is not being shown</li> </ol>

<p>16. Selects specific vendors from search results.</p> <p>18. Repeat query and selection for vendors within 50 miles of second address</p>	<p>17. Process vendor selection</p> <ul style="list-style-type: none"> <li>a. Record selection</li> <li>b. Present notice of further distribution</li> <li>c. Present link for additional details and opting out</li> <li>d. Present search interface again for additional selections, along with list of currently selected recipients</li> </ul> <p>19. Repeat Search results and recordation of new selections</p>
<p>MyPal's interface indicates one or more dealers have been excluded due to Sally's personal blacklist (as stored in her personal data store). Sally double checks that list and totally agrees: Bob's Chryota is never getting her business again!</p>	
<p>20. Review list of blacklisted vendors</p>	<p>21. Display vendors blacklisted by Sally and excluded in vendor Searches for this pRFP.</p>
<p>Based on Sally's searches, MyPal suggests two additional vendors, one an online car dealer and another a car broker near Sally's home. Sally decides not to include those two in her recipient list.</p>	
	<p>22. Display suggested vendors outside Sally's search criteria.</p>
<p>As she reviews possible recipients, MyPal displays the reputation information available for each Vendor. Sally drills down on the reputation details for two of the vendors, using MyPal's tracking data. At this point, she decides not to pay for the details provided by any of the third party reputation services.</p>	
<p>24. Review additional reputation information</p> <p>26. Ignore fee-based reputation detail</p>	<p>23. Display reputation along with each vendor, with link to more information.</p> <p>25. Present additional reputation information for selected vendors, offering deep-dive details for a fee.</p>
<p>When submitting this information, Sally authorizes MyPal, eBay, and Equifax<sup>1</sup> as reputation providers for this transaction, linking this particular pRFP to Sally's reputation and tells Vendors that this transaction will be recorded for reputation tracking (of both Sally and the Vendor) at those three services. In exchange for this tracking information, the reputation providers agree to incorporate this transaction in future reputation scores and to provide a current reputation score to approved Vendors on a freemium business model: a simple score for free, details for a fee, while depersonalizing all information presented to help protect Sally's privacy.</p>	

<sup>1</sup> These companies don't currently offer anything like this

<p>27. Select MyPal, eBay and Equifax as reputation providers.</p> <p>29. Log in to eBay &amp; Equifax to authorize tracking this pRFP for reputation purposes.</p>	<p>28. Record selection of reputation providers. Register pRFP with each reputation provider and redirect to Sally for authorization.</p> <p>30. Store token/certificate/identifier from each reputation provider for future use.</p>
<p>Sally also specifies that all questions asked during the pRFP process will be confidential, as will be their answers.</p>	
<p>31. Specify a confidential communications for Q&amp;A about the pRFP</p>	<p>32. Record Q&amp;A communications preference.</p>
<p>After a final review of the details, Sally tells MyPal to publish the pRFP, selecting the £25 option that will process offline paperwork, contact legacy vendors who haven't yet registered with MyPal, and host a protected inbox for communications with vendors. MyPal sends a notice to all of the Vendors on Sally's recipient list, giving them a way to review the pRFP once they agree to Sally's terms of use. For legacy vendors, MyPal makes a phone call, letting them know about the pRFP and recommending they sign up through their relationship with Chryota.</p>	
<p>34. Review &amp; Publish pRFP, accepting the £25 fee for MyPal's offline integration services.</p>	<p>33. Present final pRFP details for review &amp; confirmation.</p> <p>35. Bill for services using existing payment mechanism</p> <p>36. Contact existing vendors.</p> <ul style="list-style-type: none"> <li>a. MyPal automatically sends notices to registered vendors, providing the URL for accessing the RFP information.</li> <li>b. For non-registered vendors, MyPal contacts them directly, via telephone. Since all the vendors chosen by Sally are Chryota Authorized, MyPal recommends they simply sign up for the HEARING AID program to access the waiting pRFP.</li> </ul> <p>37. After authenticating authorized dealers, MyPal provides access to the pRFP, including means for the dealer to contact Sally.</p>
<p>Sally receives inquiries from two of the Vendors through MyPal, to which she replies. In her replies, she specifies that she wants the dealer to login to view her reply, rather than sending the message in clear text directly to the recipient</p>	
<p>40. Read inquiry</p>	<p>38. Receive inquiry from Dealer, store locally</p> <p>39. Notify Sally of inquiry</p> <p>41. Display inquiry with links to pRFP and respond interface</p>

<p>42. Respond to question, requesting MyPal require login to read her answer.</p>	<p>43. Store Sally's response with pRFP and notify Dealer of response.</p> <p>44. After Dealer login, display the response</p>
<p>She ultimately receives offers meeting her criteria from three Vendors; those offers are hosted at MyPal.</p>	
<p>46. Review offers</p>	<p>45. MyPal accepts incoming responses to the pRFP from three vendors.</p> <ul style="list-style-type: none"> <li>a. Authenticate vendors</li> <li>b. Store proposal</li> <li>c. Notify Sally of pRFP responses</li> </ul>
<p>After receiving the offers, Sally calls Chryota of London and asks some additional questions. She takes notes on the conversation, which are stored along with the Vendor's offer at MyPal.</p>	
<p>47. Get phone # from MyPal 48. Call Chryota of London 49. Take notes on the conversation</p>	<p>48. Display unique telephone # for Chryota of London.</p> <p>50. Add text note to pRFP</p> <ul style="list-style-type: none"> <li>a. Associate note with Chryota of London's response to pRFP</li> <li>b. Record date &amp; time of note</li> </ul>
<p>Sally sends her husband a link to the offer (provisioning access via MyPal, and specifying her husband's contact service, LinkedFace) and asks what he thinks.</p>	
<p>50. Ask husband for input on the deal</p> <ul style="list-style-type: none"> <li>a. Provision husband for pRFP access, using his contact service, LinkedFace.</li> <li>b. Add a quick note asking for his opinion.</li> <li>c. Specifies to include the note but not the pRFP details in the notification.</li> </ul> <p>54. Authenticate into LinkedFace (proving to her husband's service that she is his wife)</p>	<p>51. Provision husband for access</p> <p>52. Start sending husband note</p> <ul style="list-style-type: none"> <li>a. Use discovery to find husband's preferred communications channel at his contact service</li> </ul> <p>53. On authentication challenge from LinkedFace, send Sally to authentication web page.</p> <p>55. After authentication, redirect Sally back to MyPal</p> <p>56. Send message to husband using his preferred</p>

	communications channel indicating a message from Sally is waiting at MyPal
<p>He likes it, but doesn't want the proposed audio system, suggesting a different model, just out from Bose.</p>	
<p>55. Husband reads &amp; replies to the message.                  a. Reads the note in email client                  b. Click on URL for pRFP                  c. Log in to MyPal using iName</p> <p>57. Authenticate at iName provider</p> <p>61. Add a comment to Sally on the pRFP</p>	<p>56. Redirect to iName provider for authentication</p> <p>58. After authentication, redirect to MyPal</p> <p>59. Display pRFP</p> <p>60. Provide interface for comments &amp; additions</p> <p>62. Notify Sally of the new comment.</p>
<p>Sally sends a quick message to the Vendor, using MyPal to track the conversation, asking for the alternate sound system. The Vendor replies with an updated offer.</p>	
<p>63. Sally asks Chryota of London for a revised Proposal with the new sound system.</p>	<p>64. Notify Chryota of London of an update on the pRFP and display the request when they log in to read it.</p> <p>65. MyPal accepts the updated offer from Chryota of London, notifying Sally of the update.</p>
<p>Sally likes it and decides to pay £25 for Equifax's detailed reputation history for Chryota of London. She finds a history of recent transactions as well as reviews from actual customers in her area. Some of the reviews aren't so glowing, but they seem rare and from the comments, the customer may have been the unreasonable party.</p>	
<p>66. Request detailed reputation history from Equifax</p> <p>68. Review Chryota's detailed reputation history.</p>	<p>67. MyPal provides Equifax's details to Sally</p> <p>a. MyPal verifies approval for the £25 on the credit card currently on file.</p> <p>b. MyPal charges the credit card</p> <p>c. MyPal purchases the details through Equifax's online API</p> <p>d. MyPal downloads the purchase details, stores it with the pRFP and presents it</p>
<p>After one last surf around the net to check out her alternatives, Sally makes her decision and commits to the sale, taking her to Step 4 of the Car Buying Engagement Model.</p>	
<p>69. Commit to the purchase</p>	

<p>71. Confirm the details of the purchase</p>	<p>70. Confirm the details of the purchase with Sally</p> <p>72. Record the purchase and notify Chryota of London of their successful bid.</p> <p>73. Chryota of London downloads the Purchase Order, including financial details for the deposit and commits the sale to its books.</p>

228

229 **Narrative – Jimmy's & Frank's Experience**

230 In this narrative, the users are Jimmy at Chryota Manufacturing and Frank at Chryota of London. The  
 231 primary systems involved are the Chryota Manufacturing CRM system (CM), the Chryota of London CRM  
 232 system (CoL), and MyPal.

233 The narrative is triggered by MyPal when Sally publishes the pRFP in step 34 of her Narrative.

234 Precursor: Chryota Manufacturing has already registered all of its Authorized Dealers at MyPal as pRFP  
 235 processor. Each of those dealers that have signed up for Chryota's HEARING AID program have installed  
 236 pRFP compatible software capable of processing incoming pRFPs.

237

User Intent	System Responsibility
<p>Frank's CRM system at Chryota of London (CoL) is the first point of contact for Sally's pRFP from MyPal. Upon receiving the notice of the pRFP, the software automatically evaluates the terms of use, generates a non-repudiatable proof of acceptance of those terms, and uses proof of acceptance at MyPal to download the pRFP. The pRFP is recorded in the CoL CRM system as a sales lead and forwarded to the central Chryota CRM system, which Jimmy sees, in accordance with the permission for further distribution authorized in the delivery envelope (as per Sally's instructions to MyPal).</p>	
	<ol style="list-style-type: none"> <li>1. MyPal notifies Chryota of London of incoming pRFP.             <ol style="list-style-type: none"> <li>a. uses prearranged secure communications channel to send pRFP invitation to CoL</li> </ol> </li> <li>2. CoL records the proof of acceptance of terms and logs the information download</li> </ul> </li> </ul> </li> </ul>
--	--

	<ul style="list-style-type: none"> <li>d. Parse &amp; Store pRFP Response information                             <ul style="list-style-type: none"> <li>i. pRFP information</li> <li>ii. pRFP Response information</li> <li>iii. pRFP Response Terms of Use</li> </ul> </li> </ul>
<p>Given Sally's financial credentials, reputation, and shopping timeframe, her pRFP escalates to the top of Frank's incoming priority list. He reviews what she is looking for, and his CRM system automatically pulls up inventory at his dealership that meets all of the automatically verifiable criteria.</p>	
<ul style="list-style-type: none"> <li>5. Frank Reviews pRFP                             <ul style="list-style-type: none"> <li>a. Logs in to CoL CRM</li> <li>b. Receives notification of new pRFP</li> <li>c. Pulls up pRFP and related internal analytics and tools</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>4.CoL Escalates Sally's pRFP                             <ul style="list-style-type: none"> <li>a. CoL's software automatically analyzes the pRFP information provided by MyPal</li> <li>b. Based on internal criteria, Sally's pRFP is flagged as a priority</li> <li>c. Frank is notified of Sally's pRFP</li> </ul> </li> <li>6. Present Sally's pRFP and related information                             <ul style="list-style-type: none"> <li>a. Key pRFP information                                     <ul style="list-style-type: none"> <li>i. Vehicle</li> <li>ii. Target Price</li> <li>iii. Delivery Timeframe</li> <li>iv. Payment preference &amp; Financials</li> </ul> </li> <li>b. Internal Analytics &amp; Inventory                                     <ul style="list-style-type: none"> <li>i. Sales priority</li> <li>ii. Inventory matches</li> <li>iii. Promotional Opportunities</li> <li>iv. Pricing tools</li> <li>v. Fulfilment tools   <ul style="list-style-type: none"> <li>1. Chryota Paperwork Reduction Options   <ul style="list-style-type: none"> <li>A. DVLA Registration</li> <li>B. Congestion Permitting</li> <li>C. Insurance</li> </ul> </li> <li>2. Customization   <ul style="list-style-type: none"> <li>A. In-house services</li> <li>A. Preferred Vendors</li> </ul> </li> <li>3. Payment Tools</li> <li>4. Delivery Options</li> </ul> </li> </ul> </li> <li>c. Additional pRFP Details                                     <ul style="list-style-type: none"> <li>i. Vehicle specifics</li> <li>ii. Custom requests</li> <li>iii. Internal CoL Tracking ID</li> </ul> </li> </ul> </li> </ul>

<p>Frank reviews the options and considers Sally's special requests. The easy one is the DVLA and permitting for the congestion charge administrator. His dealership routinely handles these matters for buyers and he's been looking forward to trying out the new semi-automated system provided by Chryota. He marks that criteria as met, with a brief note and indicating no price impact. He also connects the pRFP to the Chryota's paperwork reduction system so that the DVLA and congestion permitting will be handled as quickly as possible should they win the deal.</p>	
<p>7. Review custom requests</p> <p>9. Review first custom request</p> <p>11. Address first custom request</p> <ul style="list-style-type: none"> <li>a. Read request</li> <li>b. Read relevant internal links</li> <li>c. Add brief note</li> <li>d. Estimate price impact of \$0</li> <li>e. Estimate schedule impact of \$0</li> <li>f. Link pRFP to Chryota's Paperwork Reduction System, selecting DVLA registration and congestion permitting</li> <li>g. Mark status as fulfilled</li> </ul>	<p>8. Display custom requests</p> <p>10. Display detail screen for custom request</p> <ul style="list-style-type: none"> <li>a. Full text of customer request</li> <li>b. Top related internal links (based on semantic analysis)</li> <li>c. Price impact tool</li> <li>d. Annotation tool</li> <li>e. Internal search tools</li> <li>f. Request status widget</li> </ul> <p>12. Accept request updates</p> <ul style="list-style-type: none"> <li>a. Record updated details</li> <li>b. Update pricing &amp; schedule models</li> <li>c. Record DVLA &amp; permitting requests as explicit Fulfillment Options (to be processed by Chryota's system if CoL wins the pRFP).</li> <li>d. Set status as request fulfilled</li> </ul>
<p>For the second request, the custom color, Frank picks up his phone and calls his favorite custom paint shop, asking for a price quote. He gets about two of these every month and the shop loves to work with the dealership. Within 15 minutes he has a firm, fixed price quote faxed to him from the shop. The fax isn't printed out. It goes directly into the CRM system, routed to Frank. Frank attaches the digital fax to the pRFP as an internal supplement (not to be redistributed), marking the criteria met, and entering the appropriate price impact (based on the shops price plus 10%).</p>	
<p>13. Review second custom request</p> <p>15. Address second custom request</p> <ul style="list-style-type: none"> <li>a. Read request</li> <li>b. Pull up phone number for paint shop</li> </ul>	<p>14. Display detail screen for custom request</p> <p>16. Display list of preferred vendors</p>

<p>17. Call paint shop and request quote</p> <ul style="list-style-type: none"> <li>a. Verbally describe car &amp; request</li> <li>b. Provide internal tracking ID</li> <li>c. Request fax to CRM fax #, reference tracking ID#</li> <li>d. Annotate pRFP to note phone call to Dealer</li> </ul> <p>20. Review Fax &amp; Update record</p> <ul style="list-style-type: none"> <li>a. Enter price impact</li> <li>b. Enter schedule impact</li> <li>b. Mark status as request fulfilled</li> </ul>	<p>18. Record annotation</p> <p>19. Receive Fax from Paint Shop</p> <ul style="list-style-type: none"> <li>a. Route digital fax to incoming receptionist</li> <li>b. Receptionists reads sales ID# and attaches fax to pRFP</li> <li>c. CRM system notifies Frank of incoming Fax</li> </ul> <p>21. Accept request updates</p> <ul style="list-style-type: none"> <li>a. Record updated details</li> <li>b. Update pricing model</li> <li>c. Update schedule estimates</li> <li>d. Set status as request fulfilled</li> </ul>
<p>Finally, Frank reviews the delivery details and links the pRFP to their internal delivery scheduler, which confirms a £100 price impact, which is automatically entered into the pRFP tracking record.</p>	
<p>22. Process delivery details</p> <p>24. Select a delivery option</p>	<p>23. Present delivery scheduler</p> <ul style="list-style-type: none"> <li>a. Present delivery options for customer's address</li> <li>b. Present scheduling conflicts for proposed delivery window based on estimated sales dates</li> <li>c. Present possible price impacts depending on actual delivery date and means</li> </ul> <p>25. Record delivery option</p> <ul style="list-style-type: none"> <li>a. Record estimated delivery date in scheduler</li> <li>b. Update pRFP with pricing impact</li> </ul>
<p>Before preparing a final offer, Frank sends an inquiry to Sally asking if the initial £10,000 payment will be made in cash at the dealer, by personal or cashier's check through the post, by electronic check, or did she have another idea? The question is entered into the CoL CRM, which forwards it to Chryota's HEARING AID software and attaches the inquiry to the pRFP and automatically submits the message to MyPal. Sally's reply the next day clarifies that electronic check would be preferred. The reply is routed through MyPal to Chryota of London, automatically attached to the customer record, alerting Frank to the incoming message, and a copy is also sent to Chryota. Frank reads the message and updates the record with Sally's payment preference.</p>	
<p>26. Ask customer a question</p>	<p>27. Handle sales inquiry for pRFP (CoL)</p> <ul style="list-style-type: none"> <li>a. CoL records the message internally</li> <li>b. CoL copies message to Chryota Manufacturing</li> <li>c. CoL sends message to MyPal, using the Preferred Contact Channel specified in the pRFP</li> </ul>

<p>[29. Sally responds to inquiry.]</p> <p>32. Process sales inquiry response a. Review response b. Update Payment Options</p>	<p>28. Handle sales inquiry for pRFP (MyPal) a. Accept incoming message from authorized pRFP Respondant b. Record message c. Notify Sally of inquiry</p> <p>30. Handle inquiry response (MyPal) a. Record Sally's response to the inquiry, attached to pRFP b. Forward to pRFP Respondant as pRFP Inquiry Response i. Package response as pRFP Inquiry Response A. pRFP Inquiry Response DocType (identifying this as a pRFP Inquiry Response) B. pRFP Inquiry Response ID C. pRFP ID D. pRFP Respondant ID E. pRFP Broker ID F. pRFP Inquiry ID G. pRFP Inquiry Response ii. Use prearranged secure communications channel to send pRFP invitation to CoL</p> <p>31. Handle inquiry response (CoL) a. Parse incoming response b. Attach response to pRFP c. Forward response to CM d. Notify salesperson of response</p> <p>33. Record updated payment option a. Echo update to CM</p>
<p>Frank walks over to his supervisor's office, bringing his tablet computer with the pRFP and offer ready for review. His boss pulls up the pRFP record on his machine, asks a few questions, and electronically approves the offer. Chryota of London's CRM system packages the offer and sends it to MyPal, which notifies Sally. CoL also sends a copy of the offer to Chryota's HEARING AID program.</p>	
<p>34. Submit pRFP Response for approval</p> <p>36. Review pRFP Response (Frank's boss)</p>	<p>35. Handle pRFP Response approval request a. Update pRFP Response status b. Notify Frank's supervisor</p> <p>37. Display pRFP Response Details</p>

<p>38. Approve pRFP Response (Frank's Boss)</p>	<p>39. Handle pRFP Response approval confirmation</p> <ul style="list-style-type: none"> <li>a. Update pRFP Response status</li> <li>b. Send copy to CM</li> <li>c. Send pRFP Response to MyPal</li> </ul>
<p>Jimmy's dashboard presents a running view of the status of all pRFPs, resulting offers, and finalized deals, including key analytics and metrics about cost of acquisition, estimated manpower per sale, margins, and projected time-to-sale. Jimmy keeps on top of these numbers, because he knows their equivalents in the traditional advertising &amp; sales funnel for Chryota. So far, people are coming in at a lower cost of acquisition, and apparently further along in the purchasing process, which is resulting in a rather attractive time-to-sale.</p>	
<p>40. Reviews program metrics</p>	<p>41. CM presents ongoing metrics based on incoming updates from all authorized dealers in the program</p>
<p>Within an hour, Frank gets a call from Sally, routed directly to him based on the phone # she called, which also pulls up the pRFP record on his computer. Sally asks about the paint shop that would be doing the work. Frank explains who would be doing it, sharing a story about one of the more memorable projects from last spring. Sally mentions she's heard horrible things about Mike's paint shop and wanted to be sure her new car would be well taken care of. Frank is able to assure her and adds a note to the pRFP that the quality of the paint job is especially important to Sally. Sally thanks him and lets him know she's probably going to make a decision in the next two days and hangs up. The call is automatically noted in the Chryota of London CRM system, and propagated up to Chryota's HEARING AID program, becoming part of the sales funneling on Jimmy's analytic dashboard. Frank writes up a quick summary of the call and updates the estimates for closing the deal and timeframe. The HEARING AID system not only combines these estimates for analysis, it also learns how good Frank is at his estimates and adjusts accordingly, giving the overall numbers the highest possible accuracy.</p>	
<p>43. Handle incoming call (Frank)</p> <ul style="list-style-type: none"> <li>a. Answer phone</li> <li>b. Confirm caller's identity and the pRFP in question</li> <li>c. Listen to question</li> <li>d. Pull up details on paint shop</li> </ul> <p>45. Address caller's question</p>	<p>42. Process incoming call (CoL)</p> <ul style="list-style-type: none"> <li>a. Identify call by unique incoming phone #</li> <li>b. Route call to Frank</li> <li>c. Automatically link Frank to sales call tracking software, which is itself already linked to the pRFP</li> </ul> <p>44. Display details on Paint Shop</p>

<ul style="list-style-type: none"> <li>a. Respond to question</li> <li>b. Make note in call tracking software</li> </ul>	<ul style="list-style-type: none"> <li>46. Record call details                             <ul style="list-style-type: none"> <li>a. Store note from salesperson</li> <li>b. Record call information (time, duration, caller ID, etc.)</li> <li>c. Update CM with call details</li> </ul> </li> </ul>
<p>Sally's request for a different sound system is routed directly to the CoL and from there to Chryota's HEARING AID program. Frank is notified via SMS that he has an incoming pRFP update. He reviews the request and is surprised, because he hadn't heard about the new sound system from Bose. He asks his supervisor if knows about it and it is new to him as well. Frank searches online to see what he can find out, and in fact, Bose just announced the new system today. He pulls up the contact information for the dealership's Bose representative and calls to ask about the new systems pricing and availability. The rep gives him the standard dealer rate and confirms he can get the system in to the dealership in two days from order. Frank requests a confirmed quote, the Bose rep faxes over the details, which, just like the paint shop quote, get attached to the pRFP and the price impact added. With the new price, Frank triggers an update on the CoL CRM, which automatically propagates to the HEARING AID program and the pRFP at MyPal, which notifies Sally.</p>	
<ul style="list-style-type: none"> <li>49. Review adjustment                             <ul style="list-style-type: none"> <li>a. Review adjustment</li> <li>b. Research request online</li> <li>c. Capture online research notes</li> </ul> </li> <li>51. Look up representative's #</li> <li>53. Call representative</li> </ul>	<ul style="list-style-type: none"> <li>47. MyPal notifies Chryota of London of adjustment to the pRFP.                             <ul style="list-style-type: none"> <li>a. MyPal packages Sally's request as a pRFP Adjustment                                     <ul style="list-style-type: none"> <li>i. pRFP Adjustment DocType</li> <li>ii. pRFP Adjustment Identifier</li> <li>iii. pRFP Identifier</li> <li>iv. pRFP Respondant Identifier</li> <li>v. Requested adjustment Description</li> <li>vi. Requested adjustment Structured Data (none)</li> </ul> </li> <li>b. uses prearranged secure communications channel to send pRFP adjustment to all authorized recipients (including CoL)</li> </ul> </li> <li>48. CoL processes pRFP adjustment                             <ul style="list-style-type: none"> <li>a. Parse pRFP adjustment</li> <li>b. Store adjustment</li> <li>c. Notify sales person of adjustment</li> </ul> </li> <li>50. Record research notes</li> <li>52. Present Partner Contact Info                             <ul style="list-style-type: none"> <li>a. Record call notes</li> </ul> </li> </ul>

<ul style="list-style-type: none"> <li>a. ask about the new system</li> <li>b. record notes</li> <li>c. enter price &amp; schedule impact</li> <li>d. Mark adjustment addressed</li> <li>e. Submit adjusted pRFP for approval</li> </ul>	<ul style="list-style-type: none"> <li>54. Record adjustment</li> <li>55. Process pRFP Approval (same as prior)</li> </ul>

## 240 Use Cases

- 241 1. Provision Use of Specific Information on Specific Terms
- 242 1.1. First Party Recipient
- 243 1.1.1.Sally's mobile phone App access to MyPal pRFP service
- 244 1.1.2.MyPal's access to pre-pRFP information at Sally's Personal Data Store.
- 245 1.1.3.Chryota ofLondon's access to pRFP and subsequent related communications
- 246 1.2. Second Party Recipient
- 247 1.2.1.Chryota Manufacturing's access to Chryota of London's pRFP Response and related
- 248 communications.
- 249 2. Send Message
- 250 2.1. Notification of availability of rights-controlled information
- 251 2.2. Stuctured Message under previously agreed upon terms
- 252 2.2.1.pRFP Response
- 253 2.2.2.pRFP Communication (Inquiry/Response)
- 254 2.2.3.pRFP Adjustment
- 255 2.2.4.pRFP Response Adjustment (Requiring update to pRFP issuer)
- 256 2.2.5.pRFP Response Update (for synchronization of record)
- 257 2.3. Notification to Sally of pRFP activity
- 258 3. Request/Release Information on Specific Terms
- 259 3.1. pRFP release from MyPal to CoL
- 260 3.2. pRFP release from CoL to CM
- 261 4. pRFP Recipient Search Mechanism (Vendor discovery tool)
- 262 5. Data Manipulation Interfaces (CRUD<sup>2</sup>)
- 263 5.1. pRFP
- 264 5.2. pRFP Response
- 265 5.2.1. Custom Request
- 266 5.2.2. Scheduler
- 267 5.2.3. Price Estimator

---

<sup>2</sup> CRUD = Create, Read, Update, Delete, the basic actions for data records. Confirmations and approvals are simply updates to the state of a particular record.

268	5.2.4. Incoming Call
269	5.2.5. Incoming Fax
270	5.3. pRFP Communication (Inquiry)
271	5.4. pRFP Communication (Response)
272	5.5. pRFP Adjustment (Communication with impact on product, pricing, terms)
273	5.6. pRFP Response Adjustment
274	5.7. pRFP Response Request for Approval
275	5.8. pRFP Response Approval
276	6. Data Evaluation/Analysis/Transformation
277	6.1. pRFP Template fill
278	6.2. Customer Qualification (prioritization of Sally as potential car buyer)

## 308 **Standard Information Sharing Agreement Requirements**

309 Based on this engagement model, we suggest the following should be addressed in the Standard  
310 Information Sharing Agreement.

- 311 1. Standard Rights, Obligations, and Liabilities for
  - 312 1.1. pRFP Issuer
  - 313 1.2. pRFP Broker
  - 314 1.3. Facilitators
  - 315 1.4. pRFP Respondants
  - 316 1.5. Second Party Recipients
  - 317 1.6. Credential Providers
- 318 2. Rights, Obligations, and Liabilities in all cases, the master agreement
- 319 3. Rights, Obligations, and Liabilities particular to specific information transactions
  - 320 3.1. pRFP and related communications
- 321 4. Data
  - 322 4.1. Scope
  - 323 4.2. Derivative Data
  - 324 4.3. Use
  - 325 4.4. Security
  - 326 4.5. Retention
  - 327 4.6. Propagation
  - 328 4.7. Quality (warrants by information issuer)
  - 329 4.8. Maintenance (capability provided by information recipient to information issuer)
  - 330 4.9. Transparency (capability provided by recipient user to information issuer)
- 331 5. Extraordinary exceptions
  - 332 5.1. Legally required disclosure
  - 333 5.2. Security breach
- 334 6. Identity
  - 335 6.1. Assurance of legal entities
  - 336 6.2. Assurance of mechanical entities
- 337 7. Contract Maintenance
  - 338 7.1. Signature
  - 339 7.2. Recordation
  - 340 7.3. Third party Registration
  - 341 7.4. Notice
  - 342 7.5. Termination

## 343 Glossary

- 344 1. **Individual** – A natural person, a single human being. *Sally, Jimmy, Frank*
- 345 2. **Authorizing Individual** – An Individual who has shared information with a Receiving Party. *Sally*
- 346 3. **Entity** – A corporate person, an individual or individuals operating as a business, a government
- 347 agency, or a non-governmental organization (NGO). *Chryota, Chryota of London, DVLA*
- 348 4. **Information** – Usable facts or relationships presented in context; data shared for use in a
- 349 specific context.
- 350 5. **Data** – Information encoded for storage or transmission (may or may not retain context).
- 351 6. **Shared Information** – Information voluntarily provided to a Receiving Party under specific terms
- 352 of use. *pRFP, vendor blacklist*.
- 353 7. **Service Provider** – An individual or entity providing value to other Individuals or Entities through
- 354 an interactive system.
- 355 8. **Recipient**® – A Service Provider that views and uses Shared Information. Also Authorized
- 356 Recipient. (The use case doesn't cover unauthorized Recipients) *Chryota, Chryota of London*
- 357 9. **pRFP Respondant**® – Recipient of a pRFP. To be distinguished from the recipient of a pRFP
- 358 Notice because a Respondant must have provided evidence of agreement to the pRFP Terms of
- 359 Use.
- 360 10. **Facilitator (F)** – A Service Provider that facilitates Information Sharing, but does not itself view
- 361 or use the shared information itself. Examples include Data Hosts, Authorization Managers, and
- 362 Internet Service Providers. As a litmus test, if the Service Provider could do its job without
- 363 decrypting potentially encrypted Shared Information, then it qualifies as a Facilitator with
- 364 respect to that information. Whether or not a Facilitator chooses to protect such information
- 365 using encryption or other security policies is a business decision of the Facilitator and does not
- 366 change its role as Facilitator. For example, quality control, maintenance, debugging, and
- 367 customer service are just a few areas where a Facilitator may incidentally have access to the
- 368 underlying information without violating its nature as a Facilitator and not a Receiving Party.
- 369 *Messages, Inc., Mr. Doorman*.
- 370 11. **Hybrid Service Provider** – A Service Provider that acts both as a Facilitator and as a Recipient
- 371 depending on the interaction. *MyPal*
- 372 12. **Personal Data Store (PDS)** – A distributable repository of information sharable by an individual,
- 373 stored at one or more Data Hosts whose access is moderated under the direction of an
- 374 Authorizing Individual using an Authorization Manager.
- 375 13. **Host (H)** – A Facilitator that stores data on behalf of individuals, for access by Recipients. *MyPal,*
- 376 *MyStuff*
- 377 14. **Authorization Manager (AM)** – A Facilitator that moderates access to a Host under the
- 378 direction of an authorizing individual. *MyPal, Mr. Doorman*
- 379 15. **Vendor** – An Entity or Individual offering a product or services "for sale". *Chryota, Chryota of*
- 380 *London, Bose, Custom Paint Shop*
- 381 16. **Agency** – An Entity providing services to the public, typically governmental or not-for-profit.
