

Steven E. Williams
Candidate Statement
IDESG

I'm a **Certified Software Engineer** as well as a **Notary Instructor** within the State University of New York system.

My work brings together many traditional as well as innovative approaches to problem solving. I'm running for a board position with IDESG because I would like to be of greater service to the identity community.

Among my particular interests is the convergence of technology and notary practice with special emphasis on **electronic notarization**. My written work is available for viewing here: <http://www.williamsassociates-ltd.com/articles>

I ask for your vote with the promise that, if elected, I will be committed to advancing the work of the IDESG.

Thank you.
