

The Identity Ecosystem Framework— Conceptual Overview

This set of slides was developed by the NPO to help in the presentation and understanding of the following aspects of the Identity Ecosystem: principal IE participants, functional overview and interactions among principal IE participants, framework needs to support IE participant activities/interactions, and need for coordination in framework development.

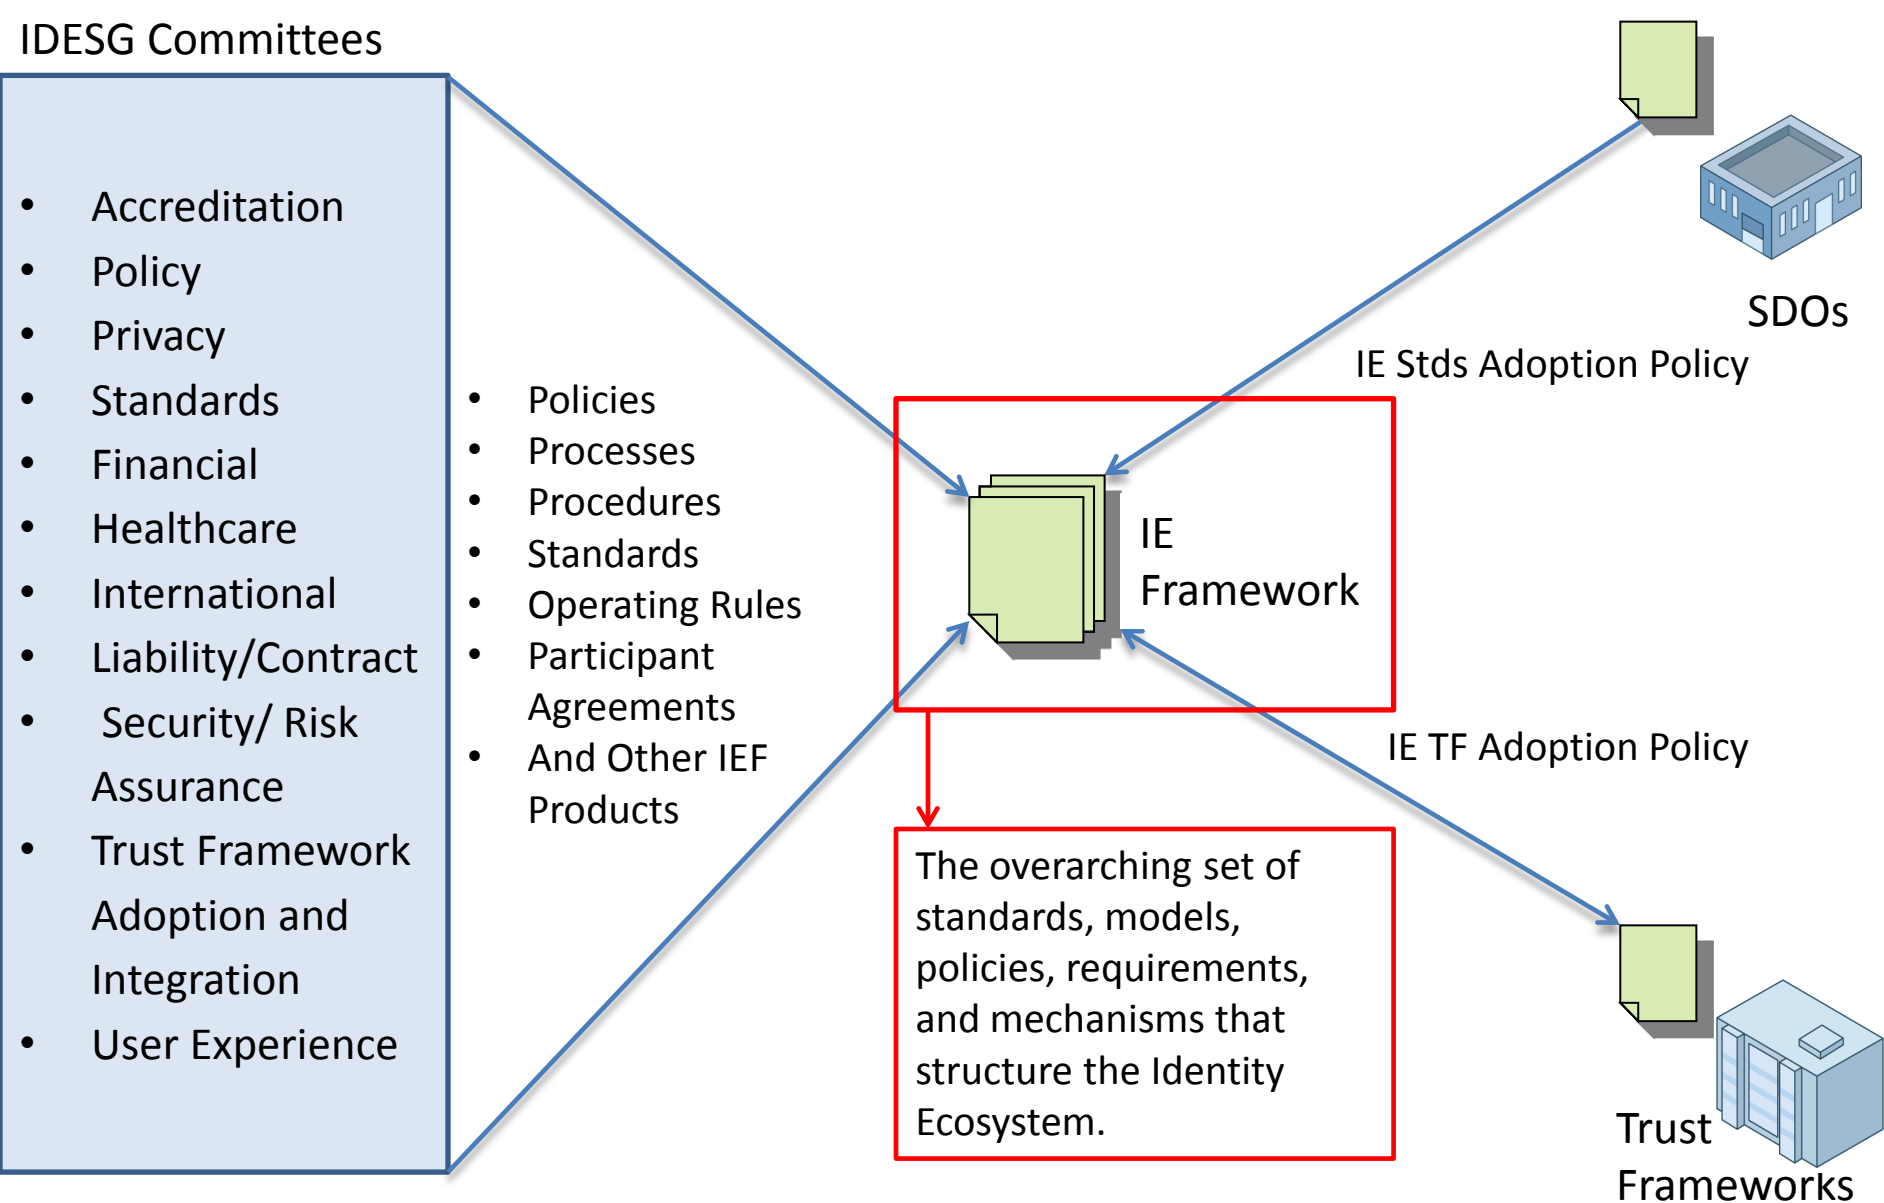

A Vision of the Ecosystem

IE Framework in Action

Building the Framework

**FRAMEWORK
COORDINATION
ROLES**

- IE Framework Components**
1. Membership & Participation Agreements and procedures
 2. Policy, Procedures, and Standards
 3. Technical Specifications
 4. Assessment & Accreditation Processes
 5. Operating Rules

Standards

**Framework
Governance**

COMMITTEE RECOMMENDATIONS & ARTIFACTS (Illustrative)

Technical Standards	Accreditation Policies & Procedures	Liability Allocation
Trustmark Procedures	Identity Proofing/Vetting Process	Authentication Rules
Privacy Policies	Interoperability Specifications	Authorization Requirements
User Control Policy	Security Requirements	Participant Agreements
Definition & Control of Metadata	Data Sharing Rules	Federation Agreements
		Trust Frameworks
