

**IDESG Deliverables Dashboard**  
**5/15/2015**  
**Accompanying Narrative**

From IDESG Framework Management Office, OASIS  
Latest version: [http://idecosystem.org/filedepot\\_download/1817/1686](http://idecosystem.org/filedepot_download/1817/1686)

This textual summary of highlights is provided to accompany our “dashboard” spreadsheet(s), which report status data on current IDESG projects relevant to the Identity Ecosystem Framework. Links to related documents may be found in the “full” dashboard spreadsheet, which also lists inactive and completed projects. Current and historical spreadsheets are available in the IDESG document repository, under the "Framework Management Office – IDESG Dashboard" folder.

Our information is only as good as reporting and visibility permits, so corrections and suggestions always are welcome. We meet regularly with the IDESG Committee Chairs group to solicit additional status data.

NOTE: **Red text** in the dashboard spreadsheets indicates a change since the previous version.

1. The FMO has reviewed the latest drafts of IDEF "baseline" functional requirements, and has delivered a proposed harmonized set to the TFTM committee, as well as to the source committees (Privacy, Security, Standards, and User Experience), marked to show proposed changes. This set of requirements will provide the principal content for the IDESG's planned self-assessment tool to be brought to the Plenary for approval in late June, and launched in 3rd Quarter 2015. (This is task TFTM04 as listed on the Dashboard grid, supported by SME-04-TFTM.)
2. Working with guidance from the TFTM committee, FMO staff are drafting rules, tool frameworks and the support structure needed to support an IDESG Self-Assessment Listing Service (SALS) self-assessment program for identity ecosystem participants, for the next 2 months. (TFTM09 – supported by SME-05-TFTM - and USER05). The dashboard has been updated to individually identify and track 21 separate deliverables under TFTM09. Previously identified tasks TFTM06, TFTM07, and TFTM08 have been rolled into TFTM09 and TFTM13. TFTM also is developing several deliverables towards that goal, including a user guide for the SALS (TFTM12) and a report on the value proposition of a trustmark program (TFTM13). The dashboard now tracks two separate deliverables under TFTM13.
3. The Standards Coordination Committee (SCC) has identified seven identity-related standards for evaluation (SME-02-STDS) as potential additions to the IDESG Standards Registry. The evaluations have been prepared and are being

reviewed by the SCC. Under the IDESG's Standards Adoption Policy, the SCC will conduct a member review of these, and then bring them for approval to the Plenary. Two evaluations, for NIST SP 800-37 and NIST SP 800-53, have already been approved by the SCC. They are expected to be presented to the Plenary planned for June 25. The IDESG Plenary approved its first standard, SAML 2.0, in April.

4. We continue to encourage you to add additional standards and specifications that are relevant to identity ecosystems to the growing IDESG Standards Inventory (see <https://www.idecosystem.org/wiki/Category:Standards>). IDESG publishes this list to the community as an open, non-evaluative series of pointers to possibly-relevant work.

5. Additional FMO staff work items recently have been proposed by the Privacy and User Experience committees, which we expect will be finalized and approved in early June.

IDESG DELIVERABLES DASHBOARD		Note: Active deliverable	Green = complete, Gold - underway,												
05/15/15 Public Release		Note: Only substantive	Red = late, White = not started
