- Identity Assurance Framework
- Identity Assurance Certification Program

Kantara Initiative Identity Assurance Builds Bridges

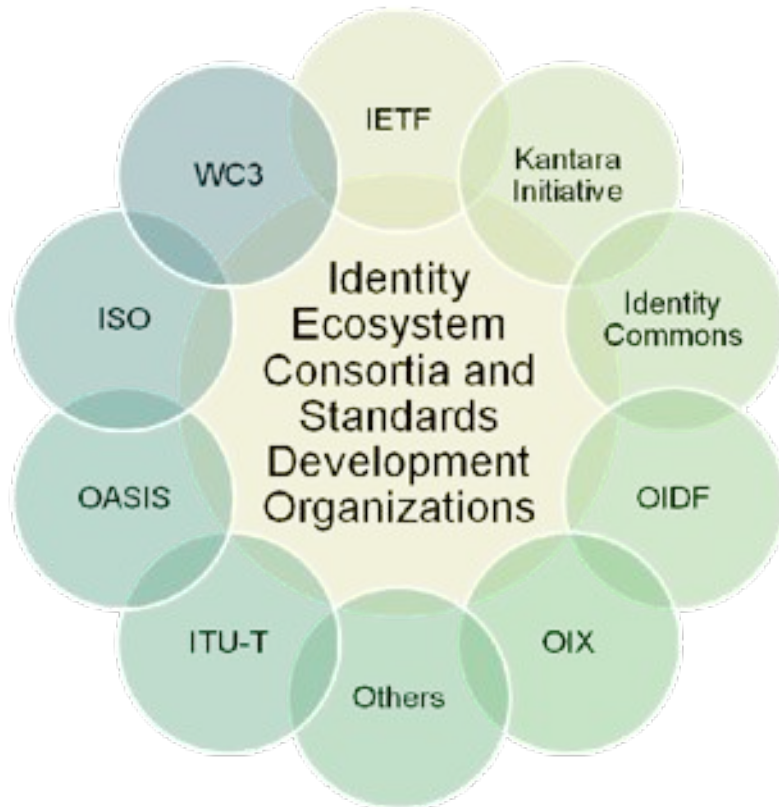

Kantara Initiative sponsors programs for the development of policies and certification standards that enable organizations to provide trusted online identity services at known levels of assurance (LOA).

With its IAF and certification programs, Kantara's goal is to provide a scalable and cost-effective mechanism to establish a standard for identity assurance that can be understood and trusted across federated identity networks and jurisdictions.

The IAF shall become the de-facto baseline for organizations to measure their compliance within particular levels of assurance for a given service or transaction, thereby fostering trust.

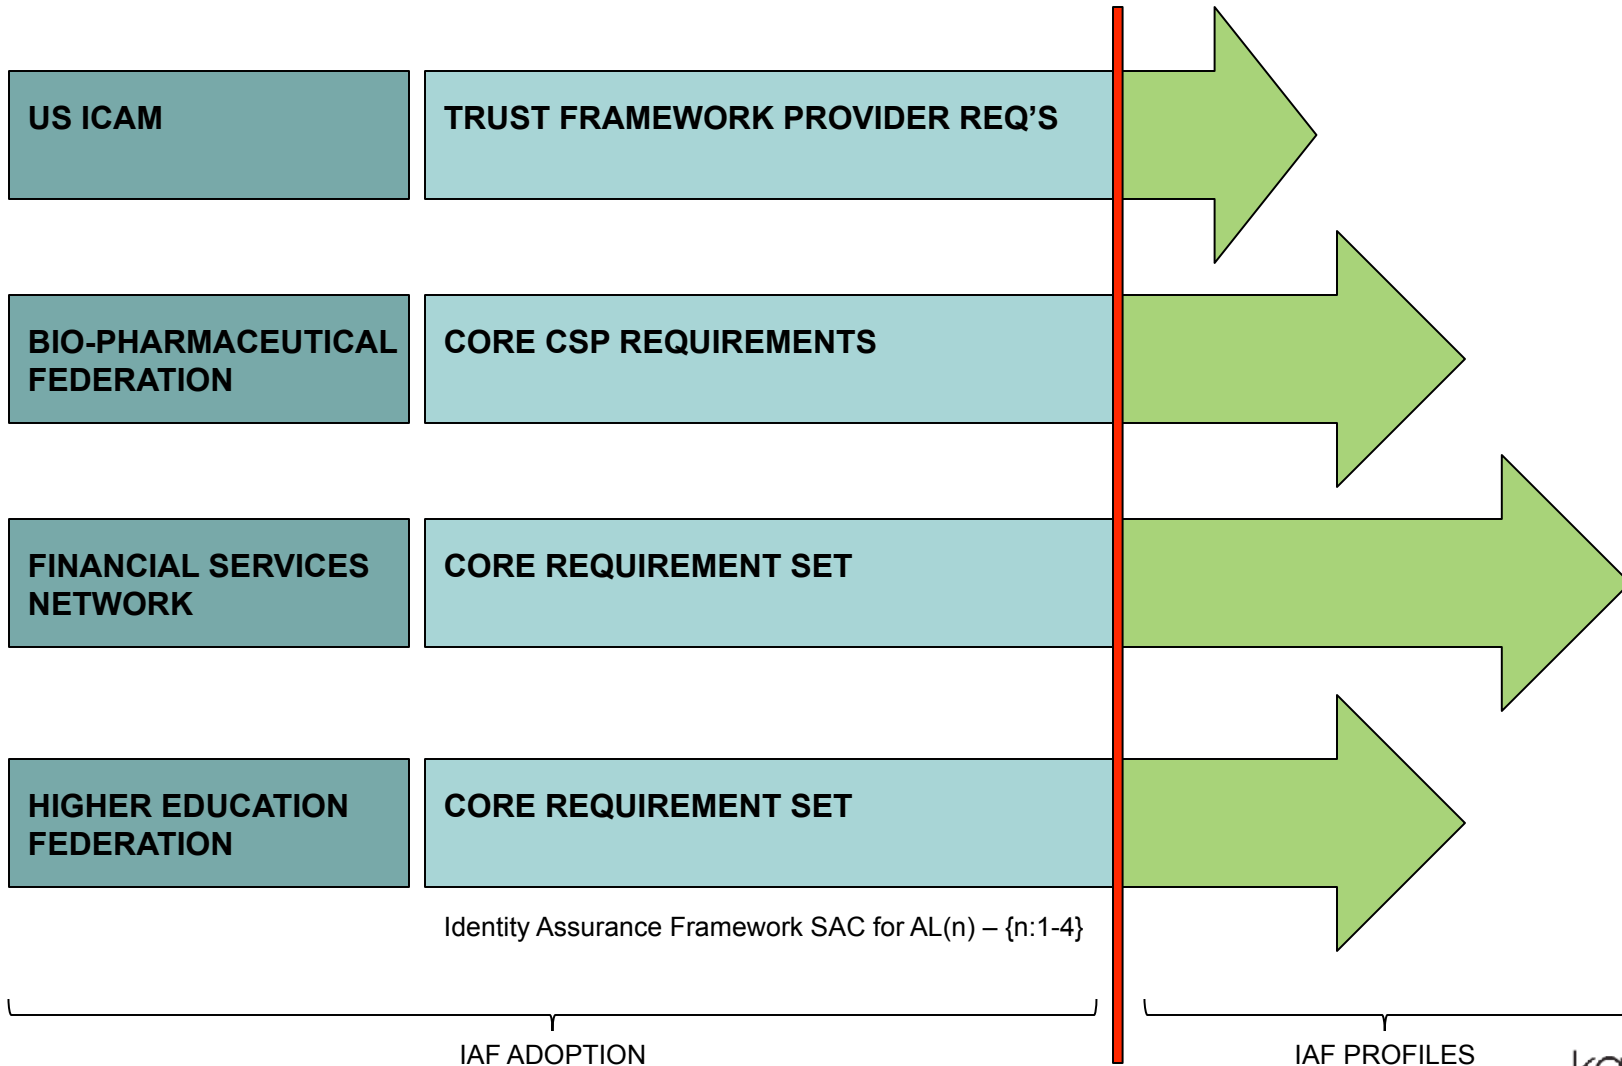

Why Certify against the IAF?

A core value of the IAF is the harmonization of existing and evolving identity assurance and trust frameworks — allowing for a single certification to be leveraged across various networks or jurisdictions.

Illustrative Examples:

What are the Real Benefits?

Cost Savings

- By Certifying against the IAF, an organization proves they immediately satisfy a substantial set of the criteria required by other federated networks.
- As Federated networks adopt IAF cost savings will be greater for organizations certified against IAF.
- Federation Operators may reduce their cost in defining and maintaining Identity Assurance policies and practices, thus reducing cost for constituents as well.

Business Agility

- An organization is able to join other IAF networks faster and more efficiently.
- The ability to inter-federate is an added value to each IAF certified service and their respective subscribers.

A Higher Standard

- The IAF is a best of breed cross-industry standard that reflects the best known practices from a substantial cross-section of industry and government. It benefits from a large and deep pool of contributors not available in any single federated network.
- Over time IAF will cross-pollenate other networks providing a consistently higher standard for Identity Assurance.

How does the IAF work?

- The IAF establishes Assurance Levels which reflect the value or the risk of an e-Transaction and helps to mitigate the associated risks.
- Credential Service Providers are assessed for conformity against strict service orientated criteria which vary in their rigor according to the assurance level selected.
- We use exclusively Assessors who are Accredited to perform assessments against the IAF Service Assessment Criteria.

IAF Assurance Levels Illustrated

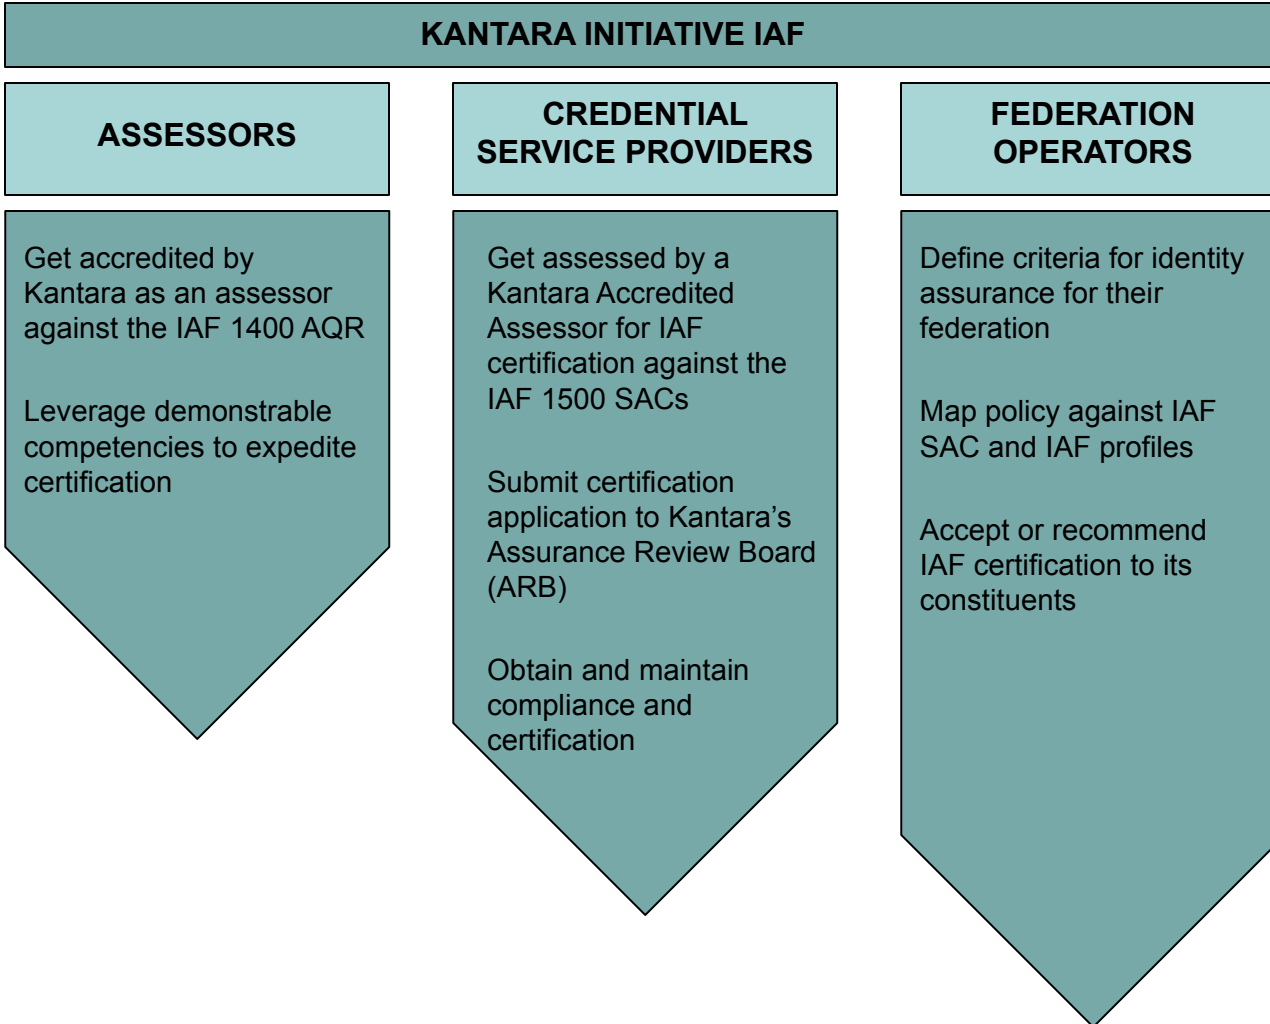

Assurance Level	Example	Assessment Criteria – Organization	Assessment Criteria – Identity Proofing	Assessment Criteria – Credential Mgmt
AL 1	Registration to a news website	Minimal Organizational criteria	Minimal criteria - Self assertion	PIN and Password
AL 2	Change of address of record by beneficiary	Moderate organizational criteria	Moderate criteria - Attestation of Govt. ID	Single factor; Prove control of token through authentication protocol
AL 3	Access to an online brokerage account	Stringent organizational criteria	Stringent criteria – stronger attestation and verification of records	Multi-factor auth; Cryptographic protocol; "soft", "hard", or "OTP" tokens
AL 4	Dispensation of a controlled drug or \$1mm bank wire	Stringent organizational criteria	More stringent criteria – stronger attestation and verification	Multi-factor auth w/hard tokens only; crypto protocol w/keys bound to auth process

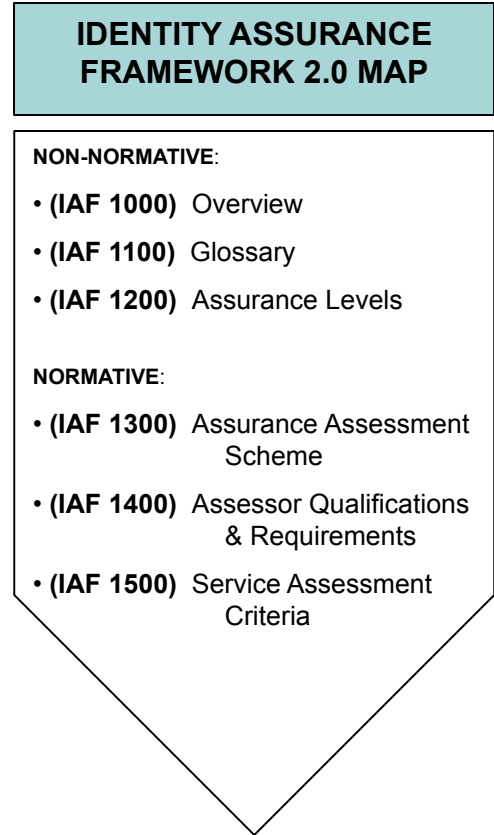

Note: Assurance level criteria as posited by the OMB M-04-04 & NIST SP 800-63

Accreditation Process: Auditors and Assessors

Certification Process: IdP /CSP

IAWG Road Map: 2011

- Q1: Finalize v1.0 of Federation Operator Guidelines
- Q1: Draft v1.0 SAC Profiling Guidelines
- Q2: Form Attribute Assurance Charter WG
- Q2: Form SAC Profile Development WG
- Q2-3: Defining Trust Framework Architecture
- Q3-4: Relying Party Guidelines

What We Ask?

- Identity service organizations adopt the IAF as their standard for Identity Assurance
- Financial sponsorship (through membership and/or directed contributions) be made to support the continued evolution of the IAF and related programs within the Kantara Initiative Certification Program
