11 **Abstract**

12 The Kantara Initiative Identity Assurance Work Group (IAWG) was formed to foster adoption of identity
13 trust services. The primary deliverable of the IAWG is the Identity Assurance Framework (IAF), which is
14 comprised of many different documents that detail the levels of assurance and the certification program that
15 bring the Framework to the marketplace. The IAF is comprised of a set of documents that includes an
16 Overview publication, the *IAF Glossary*, a summary *Assurance Levels* document, and an *Assurance*
17 *Assessment Scheme (AAS)*, which encompasses the associated assessment and certification program, as well
18 as several subordinate documents, among them the *Service Assessment Criteria (SAC)*, which establishes
19 baseline criteria for general organizational conformity, identity proofing services, credential strength, and
20 credential management services against which all CSPs will be evaluated. The present document sets out the
21 required structure of a Specification of a Service subject to Assessment, a primary component of an
22 Application for Kantara Approval and the Assessment required to support that Application.

23 The latest versions of each of these documents can be found on Kantara's [Identity Assurance Framework -
24 General Information web page](#)

25 **Filename:** Kantara IAF-3520 S3A v2-3

70 1 INTRODUCTION

71 *Introductory note:*

72 *In this model Specification of a Service Subject to Assessment (hereafter simply the 'S3A') the sub-sections of*
73 *the Introduction refer explicitly to this document.*

74 *In preparing their own specific instantiation of the model S3A, the Applicant's own text to explain their*
75 *reasons for preparing the document and seeking Kantara Registered Applicant status and/or Approval, as*
76 *required, should be placed in the Introduction. They should also add any other introductory material they*
77 *feel they require and the following Kantara text within this section should be deleted in its entirety.*

78 *This S3A is applicable to Applicants for both a Component and a Full Service Application (refer to*
79 *Kantara's Rules governing Assurance Assessments).*

80 1.1 Purpose

81 This document is intended for use by Credential Service Providers (CSPs) for the production, as a
82 prerequisite, of a Specification of a Service Subject to Assessment (S3A). Any CSP wishing to contract with
83 a Kantara Accredited Assessor to conduct an Assessment for Kantara Service Approval or achieve
84 Registered Applicant Status must submit an S3A.

85 This document provides a high level overview to the CSP's chosen Kantara Accredited Assessor and to the
86 Kantara Secretariat.

87
88 Conformance with this document is mandatory.

89 1.2 Readership

90 This document is required reading for the following parties:

- 91 • **Kantara Accredited Assessors** who will be performing the Assessment of a Credential Service
92 Provider, as defined by an S3A;
- 93 • **CSPs** submitting a Service (either a Component Service or a Full Service) for an Assessment as the
94 basis for seeking a Kantara Grant of Approval;
- 95 • **Kantara Initiative's representatives** who are available to offer guidance during the Assessment and
96 Approval processes.

97 1.3 Overview & Preparation

98 The document provides a framework of sections and sub-headings together with proposed standardized text.
99 Authors of specific S3As are required to adopt the style, phrasing and terminology of this model to the fullest
100 extent practical within the context of their own organizations. This will assist readers who have to deal with
101 S3As from a number of different sources.

102 As previously stated, the Kantara Initiative [Assurance Assessment Scheme](#) is required reading for S3A
103 authors. It sets out explicit requirements for the Kantara Initiative Approval procedures and points to other
104 detailed sources.

105 Within the suggested text there are a number of place-holders where authors should substitute the details of
106 their own organizations and Services. These are indicated using « markers » as indicated in this sentence.

107 Throughout this document a distinction is made between an **Outline S3A** associated with a request for
108 Registered Applicant status, and a **Full S3A**, which will become the focus of the Assessment itself.

109 Note: The term ‘Full’ has no relationship as to whether the subject of the assessment is a ‘Full’ service or a
110 service ‘Component’ – in either case, Outline and Full S3As are required, as further described below.

111 Only the Outline S3A should be submitted to Kantara. The Full S3A is likely to be designated ‘Commercial
112 In confidence’. Confidentiality is protected by the terms of an independent agreement signed with the chosen
113 Assessor. However, certain parts of the Full S3A will be taken directly and used in preparing the Kantara
114 Assessment Report and ultimately in Kantara’s Grant of Approval.

115 In order to alert the CSP as to which parts of their S3A will be extracted when preparing their Kantara
116 Assessment Report, those parts of this model document are framed in blue (as per this exemplar paragraph).
117 Kantara will extract such text from the Kantara Assessment Report and use it when preparing its Grant of
118 Approval.

119 Kantara recommends that the contents of the S3A be agreed-to with the chosen Assessor prior to the
120 Assessment. This will assist the Assessor in understanding the Service to be assessed and will ensure
121 documentation of a sufficient and mutually-acceptable level of detail. It is furthermore a requirement that the
122 S3A be revised as necessary to accurately define the Service as actually assessed.

123 Kantara recognizes that individual companies will have their own house styles and possibly specific service-
124 related requirements that will dictate the final appearance of their S3A, and hence it is understood that the
125 Kantara Initiative styling of this model document may be substituted by the owner’s own style. It is further
126 assumed therefore that any specific instantiation of this model will be subject to the owner’s own
127 configuration management practices.

128 Improvements, enhancements and the provision of additional information to support the explanation of the
129 SACs are fully encouraged within the constraint of following the model format as much as possible.

130 Definitions of terms and acronyms that are not defined in this document may be found in the Identity
131 Assurance Framework [Glossary of Terms](#).

132 Within the following Sections, an indication is given as to whether the heading and related text is applicable
133 to an Outline S3A, a Full S3A or both.

134 **1.4 Changes in this revision**

135 The principal reason for changes in this revision is the introduction of a new section in which Applicants can
136 describe and justify any Comparability solutions their service may provide. All changes in this revision are
137 indicated by grey shading.

138 2 PURPOSE & READERSHIP

139 *The following text is suggested for those seeking Kantara Registered Applicant status, i.e. preparing an*
140 *Outline S3A.*

141 This document is the primary reference governing «company»'s application for Kantara Registered Applicant
142 status in respect of its «name of service» Service, as a [Full | Component «delete as applicable»] Service
143 providing the credential services described herein at Assurance Level «state level(s)».

144 It provides the necessary high-level service description, target customer market, and outline technical
145 specification required by the Kantara Initiative.

146 The document is intended to give:

- 147 i) «company»'s management an understanding of what it is they are committing to;
- 148 ii) the chosen Assessor, «assessor», an understanding of the scope of Assessment that «company»
149 requires to have conducted, and;
- 150 iii) the Kantara Assurance Review Board the basis for considering and accepting «company»'s
151 application for Registered Applicant status.

152 *The following text is suggested for those wishing to have their services assessed and submitted for Kantara*
153 *Approval, i.e. a Full S3A.*

154 This document is the primary reference governing the Assessment and submission for Kantara Approval of
155 «company»'s «name of service» Service.

156 The document is intended to:

- 157 i) give «company»'s management an understanding of what it is they are committing to;
- 158 ii) define the full scope of the Assessment to be undertaken;
- 159 iii) define what evidence is to be provided and how it demonstrates compliance of the Service as a
160 whole;
- 161 iv) form the central technical scoping of the contract between «company» and its chosen Assessor,
162 «assessor»;
- 163 v) support «company»'s submission to the Kantara Initiative Board of Trustees for a Grant of
164 Approval;

165 3 SERVICE DESCRIPTION

166 3.1 Credential Service Provider

167 *The following text is required in all S3As.*

168 This document relates to «company», registered in «place of registration» under «registration reference /
169 details» whose registered office is at «registered address». «company» is «status, e.g. independent
170 corporation / wholly owned subsidiary of etc.».

171 «company»'s additional contact details are as follows: Contact person for the purposes of this Assessment:
172 Primary contact:

173 «name, title»

174 «address»

175 «telephone»

176 «email»

177 Secondary contact:

178 «name, title»

179 «address»

180 «telephone»

181 «email»

182 *The following **additional** text is suggested for those wishing to have their services assessed and submitted for*
183 *Kantara Service Approval (i.e. Full S3A). **If all following contacts are already identified in the ASA then***
184 ***simply state so, else add additional contacts here.***

185 Contact points with regard to the service (e.g. Customer Support etc):

186 Contact 1:

187 «functional title»

188 «address»

189 «telephone»

190 «email»

191 «url»

192 Contact 2:

193 «functional title»

194 «address»

195 «telephone»

196 «email»

197 «url»

198 «... additional contacts as desired»

199 3.2 Public Service Description

200 *The following text is required in all S3As*

201 This S3A relates to «company»'s service known as «name of service».

202 «name of service» is a «Public Service Description of service».

203 *The Public Service Description will be preserved throughout the Assessment process, will be included in the*
204 *Assessment Report, and used subsequently by Kantara when preparing the Grant of Approval.*

205 *The Public Service Description should describe the principal features of the Service by setting out the*
206 *purpose of the Service followed by additional detail, including, inter alia:*

- 207 - *features and functions incorporated;*
- 208 - *intended class(es) of users (subscribers and relying parties, as appropriate);*
- 209 - *list of tasks and usage;*
- 210 - *checks performed on supplied data;*
- 211 - *applicable restrictions;*
- 212 - *assumed user community characteristics;*
- 213 - *nature of provision / contracting with users & relying parties;*
- 214 - *etc.*

215 *This description must be a concise and accurate description of the scope and content of the SSA. It must be:*

- 216 - *suitable for unlimited public release;*
- 217 - *free of any jargon and marketing-hype;*
- 218 - *understandable to the non-specialist;*
- 219 - *suitable for prospective and actual customers of the service and for parties relying on the service;*

220 .

221 *Additionally, for a Full S3A, the Applicant must include a reference to the **Service Definition**, giving a*
222 *specific version number or date of publication*

223 3.3 Service topology

224 *For those seeking Kantara Registered Applicant status (i.e. Outline S3A), a system-level diagram (or*
225 *diagrams) showing physical sites (geographic locations), where specific service components are located and*
226 *what interconnectivity is employed should be provided. Brief supporting narrative should be provided to*
227 *describe the elements of the diagram(s).*

228 *For an Assessor's Service Definition (i.e. Full S3A), a system-level diagram (or diagrams) showing physical*
229 *sites (geographic locations), where specific service components are located and what interconnectivity is*
230 *employed should be provided. Supporting narrative should be provided to describe the elements of the*
231 *diagrams to a further level of detail, plus indications of levels of redundancy and resilience that are built into*
232 *the architecture, to explain the way in which the Service is managed and delivered .*

233 **3.4 Service platform**

234 *In an Outline S3A the level of detail provided under this heading need only be a generalized description.*
235 *For a Full S3A, the level of detail provided should include specific descriptions of physical premises,*
236 *hardware installations and software versions and configurations, plus details of the credential types issued*
237 *and/or managed and applicable technologies, such that the intended Assessor can plan the Assessment.*

238 **3.5 Assessor's Service Definition**

239 *This section is only required in a Full S3A. It must give a comprehensive and precise definition of the*
240 *Service, its constituent parts and its internal functions, suitable for Kantara-Accredited Assessors to identify*
241 *and scope the Service for the purpose of the Assessment. It must provide information beyond the extent of*
242 *that which would be found in the Service (Certification) Policy, Service Practice Statement and Service*
243 *Policy Disclosure Statement which an assessor would need to know in order to effectively conduct the*
244 *Assessment. The Assessor's Service Definition is not aimed at customers and is not required to be publicly*
245 *disseminated.*

246 *This definition may be in a separate document but it is defined in this Model S3A, and should consist of an*
247 *extension to the detail given in the Outline S3A, in §3.2 to §3.4 inclusive.*

248 4 COMPARABLE CONFORMITY

249 *If the Service Subject to Assessment includes features which the Applicant believes justify seeking*
250 *Comparable Conformity the following sub-section and all its parts should be included to describe each such*
251 *instance.*

252 *If the Applicant has no need to describe any Comparable Conformity this section may simply state 'None*
253 *required' (so as to preserve the section numbering system).*

254 4.1 «Descriptive title»

255 *Apply a concise yet descriptive title to the specific comparable conformity instance, capturing the functional*
256 *nature of the service's feature which requires a finding of comparability, rather than referring to any specific*
257 *criteria (this title may be used elsewhere as a label for this specific comparability and needs to have a degree*
258 *of uniqueness to aid in it being readily identifiable).*

259 *Note that this section needs to be repeated if multiple comparable controls are used for the assessed service,*
260 *but one section can be used to meet several criteria.*

261 4.1.1 Description and justification

262 *Provide a description of the aspects of the solution which differ from the 'conventional' approach, as might*
263 *be implied by existing criteria, and justify why this provider or its service's features require the move away*
264 *from direct conformity into needing to show a comparable solution. Given that §3.5 above provides a*
265 *detailed description it may be sufficient to rely upon that as the source of description (ensuring that it can be*
266 *captured discretely, rather than as an integral part of the description of the whole, e.g. having a discrete*
267 *reference) and simply provide the justification here.*

268 *Bear in mind that higher Assurance Levels must be justified by a greater degree of rigor, consistent with*
269 *demonstrating conformity with any other criteria at the selected Assurance Level.*

270 4.1.2 Affected criteria

271 *Identify, for each AL at which the service is being assessed, the criteria within the SAC against which*
272 *this specific comparable solution is to be assessed. Refer to the SAC part (e.g. 'CO_SAC) as well as the*
273 *individual criterion tag(s).*

274 4.1.3 Risk analysis

275 *Identify the risks inherent in the service if it does NOT fulfill the original criteria (i.e. determine the*
276 *objectives of the existing criteria and what they were attempting to protect against or achieve).*

277 4.1.4 Risk mitigation

278 *Provide a risk assessment which demonstrates adequate mitigation of risks identified in §4.1.3 above such*
279 *that the comparability is evident. Where there is a standards-based approach which is: a) a part of the*

280 *original criteria from which divergence is being justified; and/or, b) which underpins the justification for*
281 *adopting a comparative solution; reference to the applicable standard(s) should be made to ensure clarity.*

282

283 *As an alternative to the above three discrete clauses, and depending on how the Applicant chooses to present*
284 *the required information, a single clause “4.1.2 Affected criteria, risk analysis and mitigation” may be used*
285 *in conjunction with a table having three columns bearing the discrete title of the three individual sections*
286 *proposed above as §4.1.2 to §4.1.4, the contents of which fulfil the above-stated requirements.*

287 5 CRITERIA AND EVIDENCE

288 5.1 Applicable Service Assessment Criteria

289 *In an Outline S3A this section may simply be declared as 'TBD', since the actual version used will be*
290 *determined according to that current at the time the Assessment is undertaken.*

291 «company»'s «name of service» is submitted for Assessment against “Kantara IAF-1400 Service Assessment
292 Criteria” version «state version of SAC used as reference for this Application».

293 5.2 Statement of Conformity

294 *The SoC may be included here, be a separate document or be included within another document. However,*
295 *it is mandatory to provide it to Kantara in a form which allows the Kantara Secretariat to determine the*
296 *scope of coverage of the OP-SAC. Tables provided in the SAC are recommended as the basis for the SoC*
297 *and allow for i) the specification of the criterion tag; ii) how the criterion is fulfilled, and iii) the source(s) of*
298 *evidence.*

299 *For a Full S3A, the chosen Assessor must be provided with all three pieces of information, per criterion. In*
300 *an Outline S3A this section may simply state how it is proposed to fulfill the OP-SAC criteria, i.e. items i) and*
301 *ii) from above: for a Component Service this will be less than 100% of the OP-SAC criteria; for a Full Service*
302 *this will address all OP-SAC criteria and indicate whether, per criterion, conformity will be accomplished by*
303 *the Applicant Service Provider or by a previously-Approved Component Service..*

304 *Criteria which are subject to assessment based upon comparability (see §4 above) should be clearly*
305 *identified as such within the SoC, for both an Outline and Full S3A.*

306 **6 ADDITIONAL INFORMATION**

307 *The Applicant may provide whatever additional information is felt necessary or useful to support the S3A,*
308 *whether an Outline S3A or a Full S3A, e.g. any specific national government requirements required to be*
309 *fulfilled in addition to those established by Kantara.*

310 *The Applicant may include additional requirements that take the Assessment beyond the scope of the Kantara*
311 *Approval . It is recommended that the necessary additional parts of the document be placed in the most*
312 *appropriate section (e.g. additional criteria against which to be assessed might go under §5.1, with the*
313 *proposed evidence under §5.2).*

314 *Annexes may also be added where required, and may be an alternative holding place for the SoC.*

315 *Applicants should ensure that any additional information is clearly included as such, rather than as Kantara-*
316 *specific information.*

317 *This section may be omitted when no additional information need be provided.*
